
CAL 25

JENSEN MARINE

Cal 25
all fiberglass ocean racer–family cruiser from Lapworth/Jensen

The Cal 25 is an excellent combination of ocean racer and family cruiser designed for the needs of today's sailing families. She is a fast and able ocean racer, and consistently performs very well under a variety of conditions. In the Ensenada race the Cal 25 won both the ocean racing Class D and MORF trophies. The remarkable acceptance of the Cal 25 by sailors on both coasts has generated a strong one design class with over 300 boats in the water. This strong class organization greatly enhances the Cal 25's value, and makes it one of the best sailing investments.

For cruising, the Cal 25 has all the conveniences for comfortable and pleasurable family living—spaciousness, privacy, attractive design, and many features found only on much larger boats.

Designed by Bill Lapworth, the Cal 25 is a light displacement sloop with a long 20 foot waterline for added speed, and a spade rudder for sure and positive control under all conditions of wind and sea. Her masthead sail plan permits a good selection of headsails, with plenty of sail power for light air that's easily shortened in a blow.

Cal 25–ocean racer–family cruiser from Jensen Marine

maintenance free construction

The Cal 25, like all Cal boats, is built of fiberglass, with a high percentage of woven roving. The deck and cockpit are molded in a one-piece fiberglass section, rigid, strong and leak proof. The mast and boom are aluminum alloy. All rigging is stainless and bronze. This combination of modern materials makes the Cal 25 long lasting and maintenance free.

The Cal 25's raised deck design makes for a wide, level deck quickly appreciated by racing sailors. The unusually long cockpit, 7′6″, is self-bailing, fully scuppered and carefully laid out for efficient sailing. It extends all the way to the stern, providing plenty of leg room and extra sleeping space in warm weather.

convenient "outboard transom"

The Cal 25 has a uniquely designed "outboard transom" with a removable middle section which permits low and effective mounting of the outboard motor on the transom. It can be quickly and easily tipped up out of the way when sailing.

Cal 25 — All-new deluxe cruising interior

The main cabin of the Cal 25 is bright and spacious, with four full length foam berths for family cruising. The extra wide convertible hatch cover can be raised and covered with a hatch dodger to provide full head room and complete shelter in the main cabin. Finished in warm natural woods with a full mahogany headliner, the main cabin has a dinette which converts into a wide berth, a galley, sink, ice chest and a hanging locker. The forward compartment, with a completely enclosed head, is separated from the main cabin by a full bulkhead for privacy, and has a double berth with ample storage room under the bunks.

specifications

STANDARD EQUIPMENT: *Hull:* One-piece reinforced fiberglass lamination made of hand laid up woven roving. *Deck and cockpit:* integrally molded fiberglass lamination with additional deck stiffening. Colors and non-skid surfaces molded in. *Ballast:* cast lead, 1700 lbs. *Rigging:* aluminum mast and boom.
