- * One-year warranty.
- * Detailed parts locator and owner's manual.
- * Color package. ... **all standard.**

TIME MACHINE.

Get aboard TRAC 14 from AMF Alcott. For the time of your life.

Used to be, when you really wanted to get cooking on a catamaran and fly a hull with a crew of two, you had to go with an expensive, unwieldy sixteen.

No more.

Now there's **Trac 14**. An all new speedster that delivers all the excitement of a true performance cat in an easy-to-handle fourteen-foot package.

Trac 14 packs all the punch of the leading sixteen. It gives you a list of standard extras the others haven't even thought of yet. And none of the hassles that have kept you away from catamarans before. **Trac 14**. Everything you ever wanted from a cat. And then some.

Up to your speed.

On the water, **Trac 14** is pure dynamite.

Singlehanded, its lightning responses will start the spray flying. For two, it delivers a double dose of hull-flying sailing fun and excitement.

Catamarans are built for speed and performance. And **Trac 14** is built to take you way out front.

Ready, Set – Go!

But getting ready to set a record on the water shouldn't take you all day.

With **Trac 14** you're fully rigged and ready to get under way in twenty minutes or less. Shrouds attach with trouble-free snaphooks. While an efficient Harken roller furling system on the jib takes the tangle out of setting sail.

Trac 14 features a sophisticated sailplan and fully adjustable rig for complete, precise control. The main is fully battened, with a window. The jib – something you won't find on a Hobie® fourteen – lets you tack easier and faster, and gets the crew into the fun too. The main halyard locks at the top of the mast to guarantee proper shape of the main in any wind.

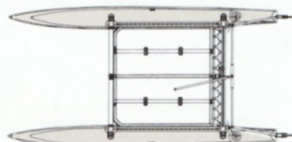

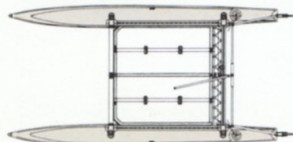

At the heart of the four-part mainsheet system, is the famous Harken hexaratchet with all roller bearing blocks. And "tweaker" lines let you adjust mast rake instantly – even while under way.

Why sacrifice comfort?

There are lots of extra touches to make **Trac 14** such a pleasure to sail. Instead of bouncing around on a hard metal crossbeam for instance, you sit comfortably out on the smooth, fiberglass hull. Built-in storage compartments keep refreshments and accessories dry and handy yet out of the way. Should you go over, righting takes a minimum of time and muscle.

Trac 14 moves through the water with an exhilarating, confident swiftness. Because of the fullness of the flotation, the bows don't have that tendency to submarine. So there's less bucking and pitch poling.

When you're ready to head for home, this cat just curls up on the top of your car. The twin hulls fold under and reduce the width of the boat from just over seven feet to just over six. And the hull and crossbeam weight has been engineered down to a manageable 150 pounds.

In every detail, **Trac 14** delivers the look, feel and performance of a thoroughbred.

All aboard for action.

With all of its impressive performance characteristics, **Trac 14** is ideal for beginners and novice sailors. Responsive yet safe and stable. Satisfying yet forgiving.

A lot goes into building each one so you can get weekend after weekend of carefree sailing out of it. The durable fiberglass hulls are virtually maintenance free. In all of the components and fittings, you'll find the kind of quality that's made us the biggest manufacturer of fiberglass sailboats in the world.

In Australia, where catamarans are king, this cat outsells them all. And no wonder. When you make a price/value comparison between **Trac 14** and any other cat on the market, you'll agree it's an ideal boating investment.

The time is right.

If you'd rather spend your weekends sailing than trailering, rigging, setting up and maintaining a boat, then **Trac 14** is for you.

With this kind of performance, matched with this kind of convenience, there just aren't any reasons left to sit on the beach and watch your friends take off into the sailing adventure.

So don't let another season go by. Give this hot new cat a test sail.

And get on the right track - **Trac 14**.
