

of the hull are extra thick to carry the concentration of stresses. Upper and double lower shrouds fasten to stainless steel chainplates 1/4" thick by 1 1/2" wide.

Underwater everything is ship shape. The underwater through hull fittings have bronze seacock and are grounded to each other, to the rudder post, and to the drive shaft. Antifouling paint is standard. The rudder has a skeg; thus it is many times stronger than a conventional spade rudder. Standard electrical equipment includes two batteries with selector switch, testing meter, and 12 (12-volt) circuit breakers. Also standard is shore power with five receptacles, circuit breaker, and 50' of cord.

Additional Standard equipment includes an emergency tiller, electric bilge pump, blower, and one-piece wrap-around rubrail.

Designer: Walter Scott  
and T.R. Allmand

## ALLMAND 31

**Aft Cabin**--The cabin features a wide 54" double berth 6' 6" long, hanging locker, overhead hatch and fold-down chart table.

**Dinette**--U-shaped dinette comfortably seats four adults. Additional seating capacity is on the opposite settee. The table lowers to form a double berth.

**Settee**--Behind the dinette is a settee/berth with storage under and behind. Using an overleaf from the dinette table, three additional adults may be seated.

**Galley**--Functional U-shaped galley, gimballed stove, large stainless steel sink with pressure water, large top-loading 8 cu.ft. icebox and abundant storage capacity for dishes and food.

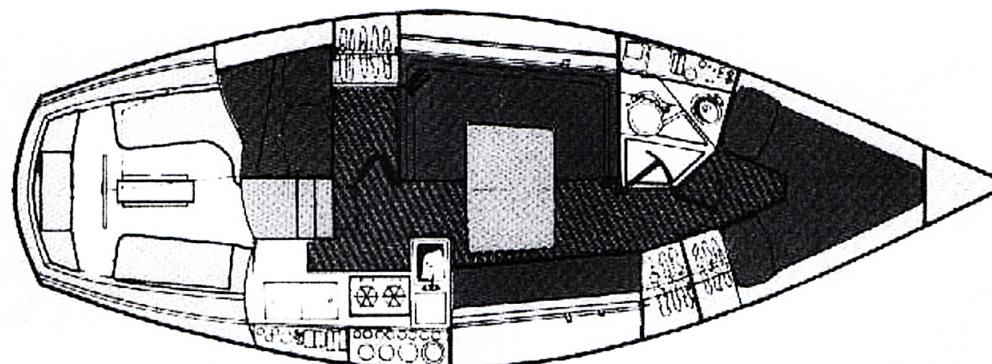

**Forward Cabin**--The forward cabin features 6' 4" V-berths with hatch, opening ports to provide both air and light. Also standard is a hanging locker with dresser top.

**Head**--Includes pressure water, vanity, marine head with holding tank and two storage cabinets.
