

# Aqua Cat 14

14'

**A**breed all its own, the Aqua Cat 14 is the ultimate in simplicity and weight-carrying ability. She can be rigged and sailed single handedly or with a crew of four and is ideal as a beginner's catamaran in surf or choppy inland waters. Wide buoyant pontoons, with turned-up bows and keel skegs, allow the Aqua Cat 14 to perform in heavy seas where other boats don't even try. Surfing and beaching this cat is easy, and it can be car-topped or easily transported by a small car. Designed to carry 1,000 pounds of people and gear, no other small cat offers so much.

Constructed of hand-laid fiberglass with positive flotation and anodized sparring, she is virtually maintenance-free. Color hulls and sails are standard. The 'boomless' rig, with mast support bars in lieu of wire stays, eliminates the swinging boom hazard com-

monly found in larger boats. The ideal carefree fun machine, within most family budgets, the Aqua Cat 14 is a deal not to miss. Call or write American Sail for the dealer nearest you.
