

aqua cat II

AQUA CAT II — The larger version of one of the world's most popular one design catamarans brings you performance, simplicity, and weight carrying capability not offered in any other catamaran this size. Featuring wide flat bottom hulls with turned up bows and a small keel skeg, this pontoon design is unequalled in weight carrying capacity and planing speed. The small keels have replaced the daggerboards used on the smaller Aqua Cat and allow for easy beaching through the surf. Designed for sailing in the ocean, heavy weather or where weight carrying capacity is needed, this Cat has it all. She is ideal for four large adults or where capability to support 1,000 lbs. is needed.

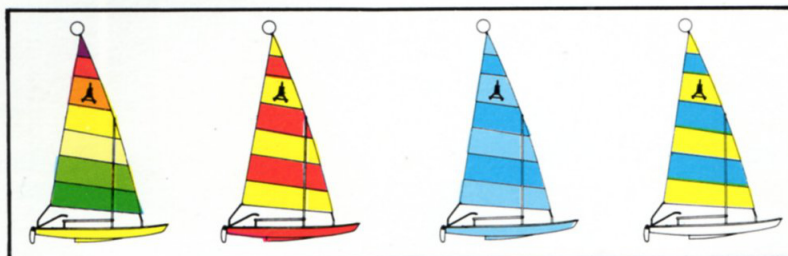

The boomless sail rig supported by the tubular A-frame provides simplicity and safety not found in traditional wire shroud designs. One sheet line and a simple tiller arrangement result in sailing simplicity, fun and excitement. Weighing in at 195 lbs. and with a 6½ foot beam, she can easily be cartopped or trailered to your favorite spot on the beach. Constructed of hand laid fiberglass, anodized aluminum tubing, and stainless steel fasteners, maintenance is at a minimum. The positive foam flotation in each hull, plus the added feature of the mast flotation ball provide a measure of confidence and safety.

Standard features include spring loaded kick up rudders, a 105 sq. ft. dacron two color sail, a 360 quick release cleat, and rudder lift systems. Available in four hull colors and four sail combinations, she is a performance fun package not to be missed. Experience the "Aqua Cat FEELING", write or call American Sail for the dealer nearest you.
