

AQUARIUS 23

MAKE FUN A FAMILY AFFAIR

The Aquarius 23 is designed with the whole family in mind. Mom, Dad and the kids will enjoy safe, comfortable experiences while trailering and cruising in an Aquarius.

To assure your peace of mind while cruising in the Aquarius, we've designed her with a high-freeboard plus she's self-righting. The non-skid deck and large, self-bailing cockpit are ideal for playful kids and for mom to stretch out and relax in the sun.

When it comes to just plain livability the Aquarius can match much larger, more expensive boats for workable space, storage and on-the-go conveniences.

Interior lining eliminates dampness.

A pop-up main hatch provides easy access to a spacious cabin with 5'11" headroom. The interior is lined with padded foxtail burlap to eliminate mildew and dampness; thus making the roomy cabin a warm, fun place to be. The headliner is also smartly styled with a padded, moisture resistant liner.

Mahogany backrest-storage compartments, with color coordinated seatbacks complimenting the interior, fit conveniently above the port and starboard berths. Pin-railing storage continues through the V-berth to the bow. This type of intelligent blending of function, style and livability will set the Aquarius apart from others in your marina.

A large galley counter top, overlooked by mahogany kitchen-ware cabinets, is designed for the cooking requirements for a family of five. With the addition of an optional sink, alcohol stove and top loading ice-box, you'll have plenty of valuable counter space remaining for other chores. A dropleaf dinette table provides a great eating and play surface for the little ones.

Interior is livable for five adults.

Deep shag carpet, window curtains and privacy curtain for the enclosed head, all color coordinated with the port and starboard backrests to make a friendly, livable atmosphere for five adults.

The quality and thoughtfulness are continued throughout the construction and rigging of the Aquarius. From her hand-laid fiberglass hull and deck to the extra strength stainless steel rigging and high quality hardware, your worry-free cruising has been carefully considered.

With her retractable centerboard and removable spade rudder, many of your most memorable experiences will come from trailering-cruising excursions to new waterways. These brief interludes of freedom

and independence from your normal daily routine will truly cleanse your spirit and become an invaluable tonic for the efficient performance of your daily activities.

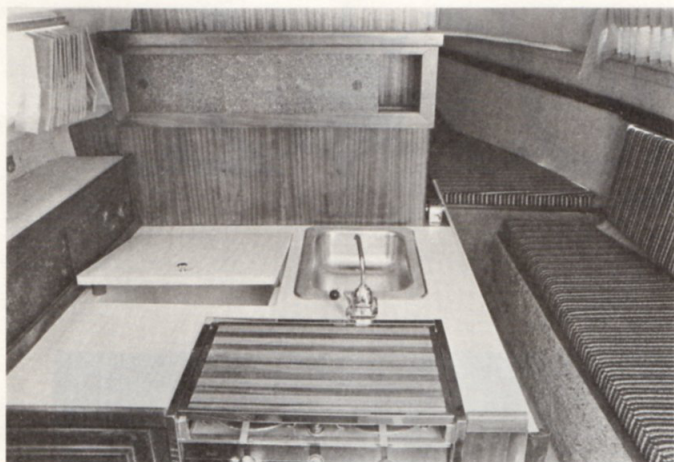

Free one year membership in N.A.S.A.

All new Aquarius owners are given a free, one year membership in the North American Sailing Association (N.A.S.A.) N.A.S.A. is families just like yours sharing one common bond; a zest for living enhanced by a trailerable sailboat built by Coastal Recreation. The Association's nationwide schedule of cruising weekends and informal class races is a great way to introduce yourself to a new Aquarius and your family to the fun of cruising by sailboat.
