

# Balboa 26

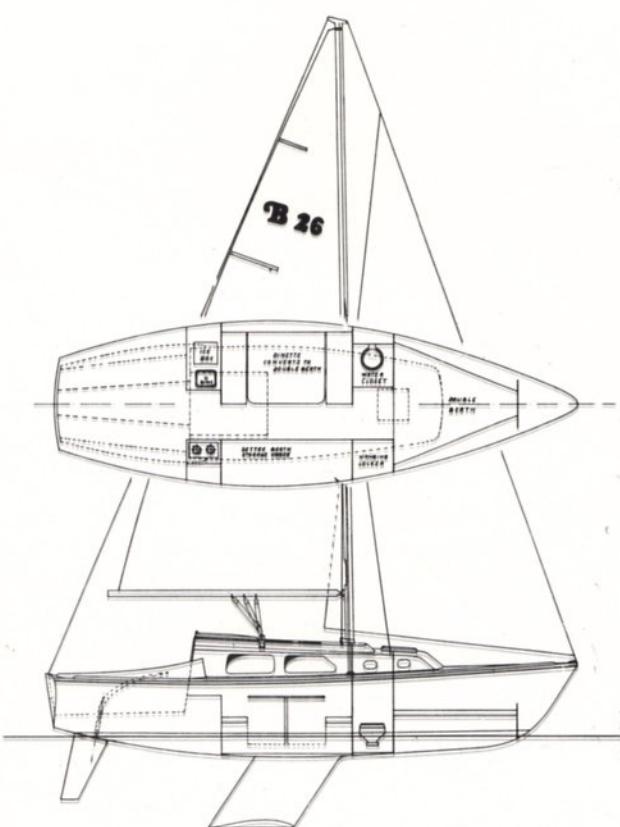

## FIXED KEEL

An added model to the new, exciting Balboa 26 is the fixed keel design. This design was added for those sailors who do not need the trailerability feature but desire the rugged dependability of the Balboa and the ultimate in performance. This boat will prove its superiority in racing against other fixed keel boats.

The major design changes are the fixed keel which weighs 2050 lbs. and the rudder which is built into position. The boat maintains the superiority in design and craftsmanship which has been the Balboa tradition.
