

BALBOA 26

The Balboa 26 is the cornerstone of the colorful and traditional Balboa line.

The 26 has proven herself race worthy in all levels of competition throughout the boating world. Yet, she maintains the style and thoughtful design to make her immensely popular with those who find cruising their boating pleasure.

Her 1200 pounds of keel ballast combine with the sleek hull design for an exceptionally "stiff" performance. The mainsheet traveler mounted above the sliding cabin hatch facilitates a finely tuned sail trim and frees the cockpit for crew maneuvering or relaxing under a warm sun.

A fiberglass liner, deep shag carpet, color coordinated cushions and window curtains make the roomy cabin an inviting atmosphere for cruising vacations.

The Balboa 26 combines the traditional line of a fine yacht with the convenience of trailability to provide a classic value for the sailing enthusiast.
