Working plans include accurate diagrams for cutting out parts controlling hull shape; no lofting or building jigs needed; assembly time  $11\frac{1}{2}$  hours complete hull 183 hours—total building time about 400 hours; total material cost \$1500 —\$2500.

Decked watertight throughout; self-righting; full positive buoyancy. A good sailer on all points, handy and without vices; good balance when reefed. Leeboards need no handling in tacking.

Large comfortable cockpit; cuddy has enough flat area for five adults to sleep, but is intended to be convenient for a couple using camp-type equipment; it's dry, well ventilated, with a good view out.
