To Sailmaker: The above dimensions and weights are suggested for the purpose of quoting price only, as a convenience to you. If you have the opportunity to measure the boat, or wish to request certain spar measurements from the builder, this will be better than making sails from this table alone. A sailplan drawing to scale is available from the builder. Alterations to the data above, determined by conference with the builder, are expected. A detailed discussion of these sails is included in our SEARUNNER CONSTRUCTION Manual. A full-size sail emblem pattern is available from the designer on request. Spot-check these dimensions against sailplan before making sails. JIM BROWN Trimarans, P.O. Box 2627, Santa Cruz, California 95060.

To Builder: Send two Xerox copies of this form to prospective sailmakers for price quotes. Fill in blanks before copying. Select 3 or 4 sailmakers only; don't shotgun the industry. Include copy of sailplan drawing on reverse side of this form. Almar and other Multihull Service firms, and many sailmakers, already have sailplan drawings and emblem patterns. Spot check these dimensions against your spars and your sailplan before ordering.
