

CS 44

44'

Our latest model, designed by Tony Castro, is a true tricabin offshore sloop with a cutter rig as an option. The hull design and deck layout represent the latest thinking in efficient hull shape and ease of handling. The deck hardware and interior appointments show a high level of sophistication, appreciated by serious sailors interested in good craftsmanship and design detailing.

Some unique features of the interior design are the two companionways, one from the aft cockpit to the aft cabin and the second from the center cockpit to the main saloon.

The side profile shows five hull ports per side set into the style band to maximize natural lighting and visibility while you're seated in the main saloon. Overhead skylights set into the deck and opening ports are employed to give more natural lighting. The deep-draft keel, as shown, represents the latest design thinking with an ex-

pected reduction in drag.

The aft cabin has a large double berth amidship. The head has a separate bathtub. A vanity, dressing table, and recessed captain's seat add to the lavish aft cabin appointments.

At CS Yachts, the luxury continues; the performance improves!

L.O.A.	44' 1"
