L.O.A. 28'1 $\frac{3}{4}$ "  
L.W.L. 22'2 $\frac{1}{2}$ "  
Beam 8'10 $\frac{1}{2}$ "  
Draft 4'0"  
Displacement 9000 lbs.  
Ballast 3500 lbs.  
Sail Area 404 sq. ft.  
Mast Height 40 $\frac{1}{2}$ '  
Designer Carl Alberg

The Cape Dory 28 offers her owner more practical cruising features combined in one design than other yachts of her size... features such as a self-tending club footed jib for effortless windward sailing... a bowsprit that incorporates an anchor roller... and a large Volvo Diesel that adds safety and dependability. These features, when combined with the famous Alberg full keel and moderate, well-distributed sail plan, result in a yacht that is easily handled by a minimum of crew. Her hefty displacement of 9,000 pounds, and her long keel with attached rudder allow the Cape Dory 28 to hold her course in a seaway. These features mean comfortable motion, stiffness, and security to all aboard. Other standard equipment such as bronze opening ports, lightning ground system, bronze seacock on all thru-hull fittings and solid bronze hardware, reflect the determination of Cape Dory to supply a cruising boat of the highest standards.

Take a close look at the Cape Dory 28. We think you'll agree she is the answer to a cruising family's dreams.
