Capri 13

The CAPRI 13, Speed and Simplicity

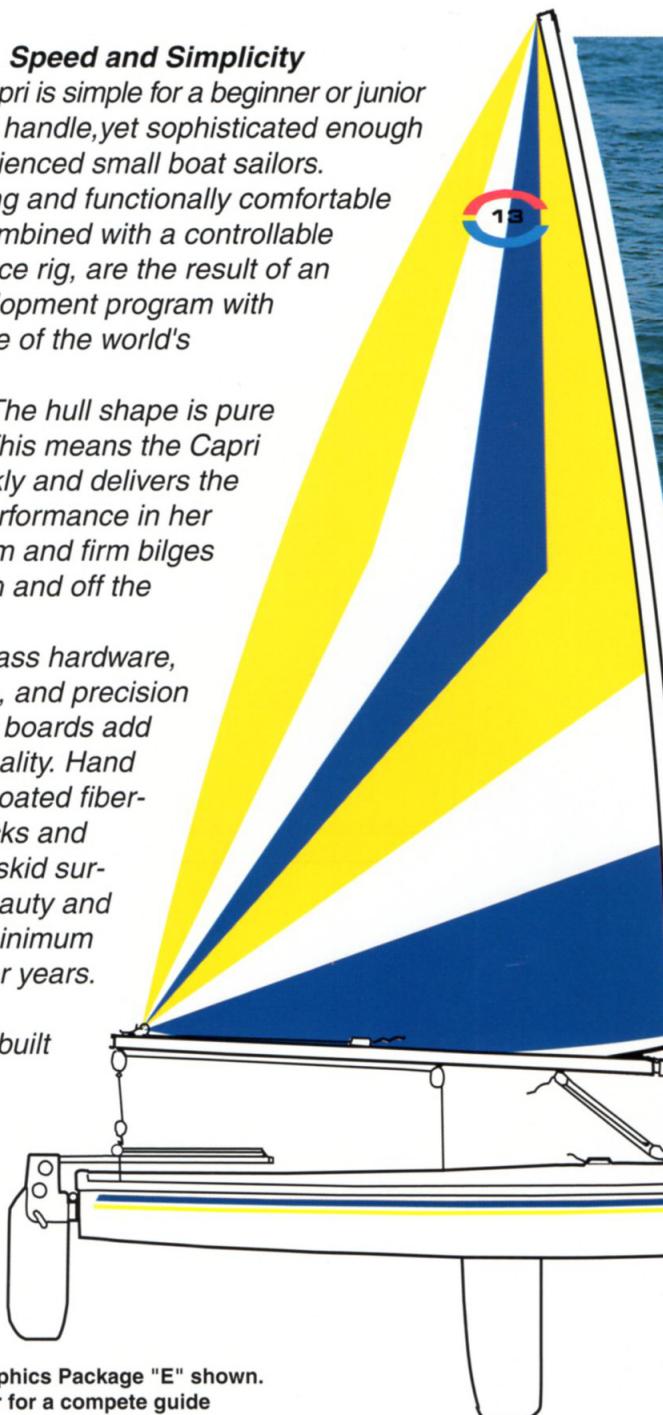

Design The Capri is simple for a beginner or junior sailor to rig and handle, yet sophisticated enough to satisfy experienced small boat sailors.

The sleek styling and functionally comfortable deck design combined with a controllable high performance rig, are the result of an extensive development program with input from some of the world's best sailors.

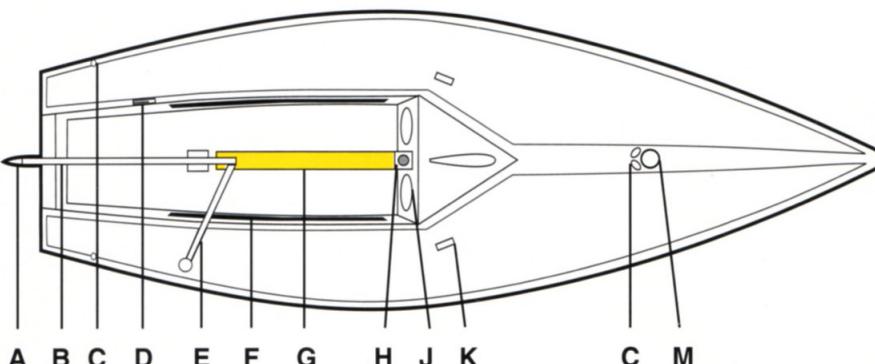

Performance The hull shape is pure performance. This means the Capri 13 planes quickly and delivers the best upwind performance in her class. The beam and firm bilges offer stability on and off the wind.

Quality First class hardware, anodized spars, and precision molded dagger boards add up to lasting quality. Hand laminated gel coated fiberglass hulls, decks and molded in non-skid surfaces insure beauty and strength with minimum maintenance for years.

The Capri 13 -
conceived and built
to be the best
in its class.
