

Catalina 250®

The Catalina 250

The Catalina 250 incorporates the best features of a trailerable, water ballast boat with Catalina's renown comfortable interior and big boat cockpit. Quality hardware and finish are some of the features that make the 250 the leader in her class.

Once underway, the gentle motion and sure-footed tracking give the impression of a much larger vessel.

The accommodations provide everything you expect in a small but proper yacht. Seating is comfortable around a table for four with plenty of lounging space on the big U-shaped settee. An enclosed head with vanity, sink and hanging locker are a welcome luxury when cruising. The efficient galley features a butane stove, deep sink, and handy drawers. The removable cooler and fresh water tank make preparing for a weekend aboard a snap.

Inspect the 250 carefully and discover the value designed and built in which promises years of family sailing pleasure and a superior resale value when it's time for your next Catalina.
