

# Catalina 34

35'

**T**he Catalina 34 is the ideal performance cruiser. Its performance is responsive, its interior accommodating, and its value outstanding.

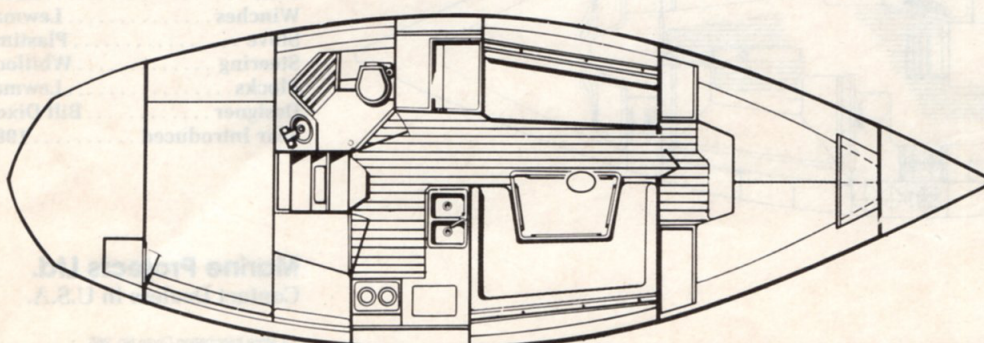

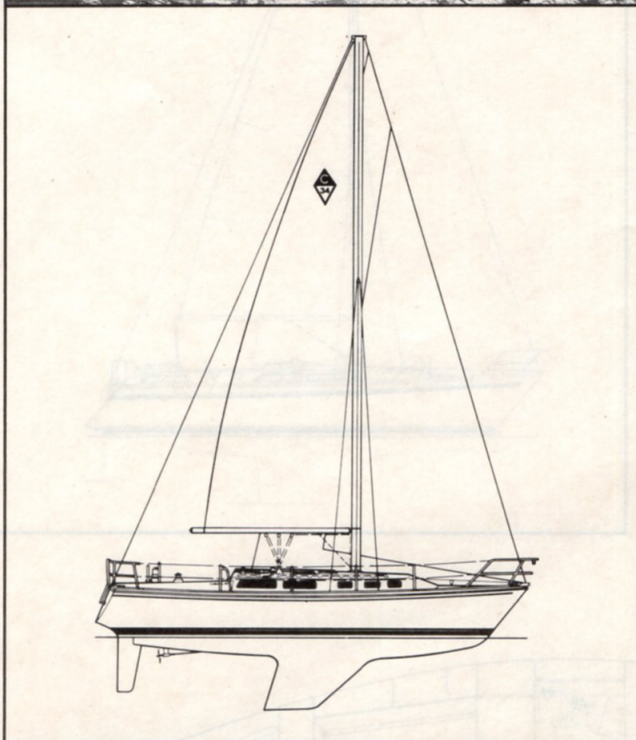

Overall, the Catalina 34 is a sleek yacht with crisp, clean lines and sturdy construction. A one-piece fiberglass hull, an engineered subsole structural system with stainless steel tie rods, a molded structural hull liner, and a stainless steel truss at the maststep provide reassuring strength at sea. A structural aluminum chain-plate-reinforcement system ties all mast loads to the hull.

The external lead-ballast keel is secured with stainless steel keel bolts. A winged keel is optional, reducing the draft to 3'10". For directional stability and tracking, the Catalina 34 features a balanced spade rudder with a horizontal skeg between the rudder and keel.

On board, the Catalina 34 is designed with a modern aft-cabin arrangement, maximizing space and affording a high degree of privacy.

The galley is highlighted with ample cabinets, flip-up counter, and a stainless steel deep-bowl double sink. The stainless steel stove and oven are gimballed, and the icebox is well-insulated with removable shelves.

The main saloon is warm and rich with teak bulkheads and cabinetry. The comfortable U-shaped settee and two-position table provide a large dining area. The dining table, which can be lowered, forms a double berth. Another settee across from the dinette provides a single berth.

The forward cabin is large and airy. Two opening ports and an overhead hatch provide ventilation. It has a double V-berth with a removable centerpiece seat.

The aft cabin is even larger with a double berth and double seat. Two opening ports and solar-powered ventilation provide refreshing comfort. Throughout the entire boat, lighting is designed for low-glare ambiance or efficient task illumination.

The navigation station is conveniently located with easy access to the electrical panel.

The head is well positioned amidships, accessible to the cockpit. It is roomy, well ventilated, and pampers a sailor with a shower seat, vanity, and sink.

The Catalina 34 is built for easy owner maintenance. Full engine and transmission access facilitate maintenance and servicing. All mechanical, electrical, and plumbing systems are specified for maximum reliability, whether you're sitting in port or cruising the seas.

The Catalina 34—the sailor's choice for performance, comfort, and value.
