

Catalina Yachts

CATALINA 400

The exciting new Catalina 400 represents a high point in the modern evolution of performance cruising boat design. The large aft cockpit with twin wheels is functional, ergonomically correct, and beautiful.

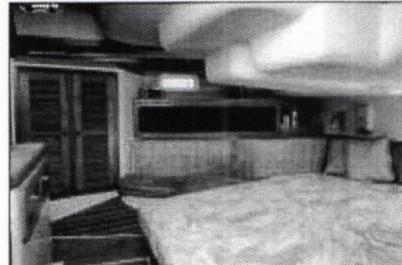

Rigging is stout and easy to keep tuned for optimal performance. Sail controls like the double ended mainsheet and rigid boom vang are logically arranged to efficiently manage the 400's powerful sail plan.

The accommodations are the finest in her class. The cabins are naturally lighted and ventilated by skylights, hatches, and ports. The galley is equipped for serious cooking without compromise. Varnished teak, ash, and coordinated fabrics complement the custom countertops and durable textured overhead.

The 400 is equally beautiful in less apparent areas such as the carefully engineered fiberglass sub-sole structural grid and well planned electrical, mechanical, and plumbing systems.

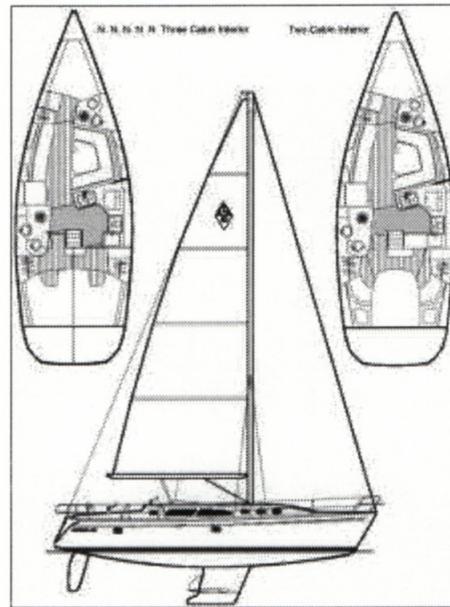

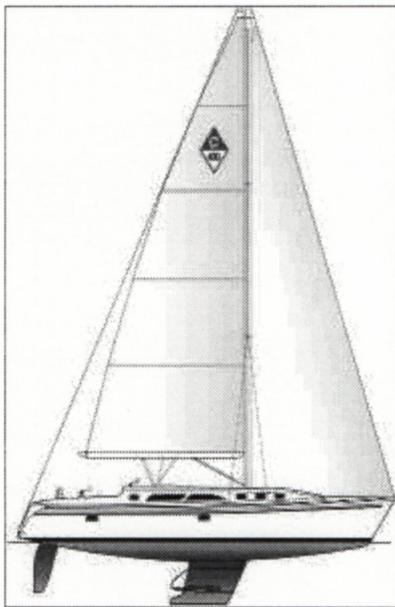

Inspect the new 400 carefully--we are confident you will discover the value and quality that make the 400 the new leader in her class.

SPECIFICATIONS

PRINCIPAL SPECIFICATIONS

L.O.A.	12.34m	40'-6"
LWL	10.62m	34'-10"
