

# Delaware Bay 60

62'

**B**ay Class Yachts are situated in the Southeast corner of England in the quaint village of Conyer. The Boatyard dates back to the eighteenth century when the famous Thames Sailing Barges were built. When these fine vessels ceased trading in the 1930s, yacht building was begun. In the early 1960s, the Spears family became the owners of this yard, and Bay Class Yachts was born.

Bay Class Yachts are custom-built to ensure the total satisfaction of their owners. All boats are designed with long-distance cruising in mind and their sea-keeping qualities are well known. Medium displacement, with a clean entry and smooth run aft, result in surprisingly fast speeds for cruising yachts.

Shown here is the Delaware Bay 60, which is a vessel that has been designed for comfortable passagemaking and luxurious accommodations for use in port. The space belowdecks allows for a layout that will give ample room for guests and separate crew's quarters.

All Bay Class Yachts are supplied with a 15-year Hull Guarantee, and it is possible to have your yacht built under the supervision of Lloyd's, American Bureau, or another classification society, for an extra charge. A Bay Class Yacht is treated with epoxy resins and polyurethane paints to give a long and trouble-free life. The interior is fully insulated behind the paneling for comfort in both cold and warm climates.

Internally, only the best quality materials are used, with top-quality hardwoods, laminates, and marine plywoods. All styling is done to the owner's taste.

Standard drawings of rig and interior layout are available. However, a half-hour discussion with our Design Director, Ted Spears, will enable him to prepare a preliminary sketch of your boat. For information regarding contract terms and financial matters, contact Bill Spears, Sales Director/Company Secretary.

L.O.A.	62' 4"
