

#### MANUFACTURER'S COMMENT

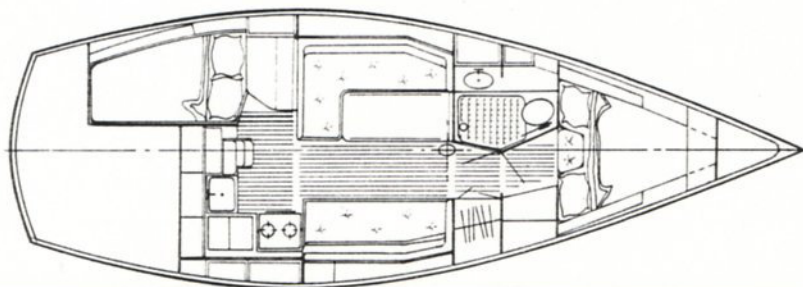

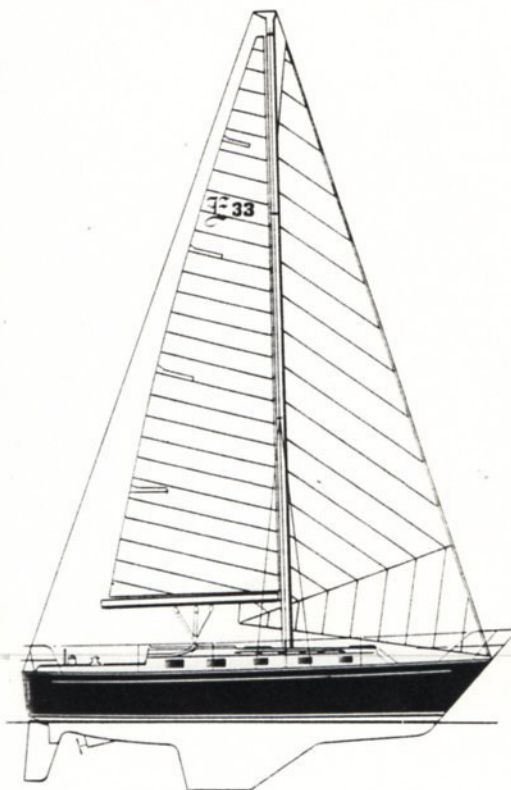

The Endeavour 33, designed by Bruce Kelley, is one of the largest, strongest and fastest boats of its size on the market. She features a fine entry which flares into a beamy midsection continuing well aft for large cockpit space and powerful reaching ability. Moderate displacement, a modified fin keel, and a spade rudder hung on a small skeg insure a hull with easy handling and good performance.

The latest building materials are combined with traditional yacht interior styling. The one-piece hand-laminated hull is cored with Klegecell with laminates of non-woven unidirectional rovings to offer tremendous strength-to-weight ratio. Furthermore, a multi-axial steel reinforced "force grid" is bonded to the hull for stiffness.

The tall double-spreader rig performs well with main 110-percent lapper. Larger genoas just aren't necessary unless you want to clean up in the Wednesday night club races.

The interior layout is spacious and remarkable for its six foot two inch headroom. The forward cabin has a six foot six inch V-berth, bureau and hanging locker. The head has enough elbow room for showering in comfort and locker space for the whole crew.

The main salon features a settee to port that converts to a double berth and a hinged table that folds up to the bulkhead. The nav. station is adjacent to a double quarter berth. Exceptional light and ventilation is achieved with ten opening ports with screens and two opening deck hatches. With teak/holly sole, teak drawer fronts and louvered doors throughout, the 33 is a warm and inviting home.

Standard equipment includes a fresh water-cooled diesel auxiliary, pedestal steering, self-tailing winches, pressure water and much more.
