

# Endeavour 52.4

52'

The Endeavour 52.4 is a high-performance cruising yacht and competitive club racer. Johan Valentijn designed the Endeavour 52.4 as well as two America's Cup challengers, *Liberty* and *American Eagle*. The yacht truly reflects the best in American design, construction, and hand-craftsmanship specifications.

By designing the Endeavour 52.4 with a full cabintrunk, headroom and cabinsole areas were optimized with the object of providing buyers with limitless interior arrangement options. In keeping the Endeavour tradition, the 52.4 is fitted with numerous hatches and opening port-holes, giving any interior arrangement an airy and spacious appearance. A look at the interior drawings will show that features of any arrangement can be combined into entirely different layouts. Endeavour is more than happy to individualize any interior modifications to suit the owner's particular requirements.

Appliances like air conditioning, washer/dryer, cabinheat, or microwave can be easily incorporated, and of course the joinerwork, finish and selection of fabrics and trim is to Endeavour's high standards.

The center cockpit design allows for uncommon spaciousness and comfortable accommodations. The yacht is powered by a Yanmar 86 hp diesel and is built with a full complement of operating systems found only in the finest yachts in the world. Teak or other selected hardwoods are available. Wing keel design standard allows for a shallow draft of 5'4".

L.O.A.	52' 4"
L.W.L.	42' 3"
Beam	15' 0"
