M A R I N E

THE CORSAIR F-24 SPORT CRUISER

The sporty F-24—smaller sister to the famous F-27®—provides all the pleasure and excitement of the Corsair sailing adventure at a more affordable price. If you enjoy fast, low-heel sailing, weekend adventuring and easy access to a favorite secluded beach, the F-24 is the boat for you. With legendary trimaran speed capabilities the F-24 also offers exhilarating performance for the racing enthusiast. For more leisurely pursuits, the broad, spacious decks and wingnets, and the extra-large cockpit with open transom and swim ladder, make this compact sport cruiser ideal for fun and relaxation in the sun and sea—it's a great platform for swimming, snorkeling and sunbathing. There are even overnight accommodations for a small family or crew. With shoal draft and centerboard the F-24 can go almost anywhere there's water. And its folding floats make it convenient to trailer to any waters served by a boat ramp, enabling you to cruise, race or daysail in an unlimited variety of places. Set up and launch takes one person about 30 minutes. Built with advanced composite technology, the finely finished F-24 is strong, lightweight and durable for great performance and lasting value. Learn more about the Corsair adventure in sailing—contact your dealer or call us today.
