# THE CORSAIR F-27 SPORT CRUISER

The F-27® is a special boat for a different kind of sailing adventure. If you want to sail fast effortlessly, without a large crew, and in comfort, this is the boat for you. Responsive to fingertip control at the helm, the F-27 points high, tacks smartly and is a joy to sail. Acceleration is smooth and swift. You will never forget the first time you catch a 10-12 knot breeze in your sail! Yet, the incredible stability imparted by the floats means dry, low-heel sailing and comfort for you and your family, whether secure in the center cockpit or spread out for relaxation and sunbathing on the broad decks and tramps. With shoal draft and retractable daggerboard, the F-27 can sail almost anywhere there is water and can even be beached. Of course, on the trailer it can go anywhere the road meets a boat ramp. Set up and launch takes one person about 30 minutes. Built with advanced composite technology, the beautifully engineered and finely finished F-27 is strong, lightweight and durable—for premium performance and lasting value. Learn more about why multihulls—led by the F-27—are now the trend in sailing. Contact your Corsair dealer or call us today.
