Easy and fun to build and to sail! This sums up the GLEN-L 12. It's a peppy performer, ideal for the beginner. Not too small, not too big, but stable enough for the non-sailor, and roomy enough for two adults and two kids. Yet packed with enough sail area in the sloop rig for exciting performance!

The GLEN-L 12 features simple, low cost construction. Only a few sheets of standard 4' x 8' plywood and some lengths of lumber are required. Our Plans and Full Size Patterns make the job easy even for the beginner. Better yet, use our Frame Kit to simplify the procedure and get you into the water more quickly.

You can outfit your GLEN-L 12 with our various kits. No need to waste time or effort shopping around for the "right" items. We've got them all and can deliver them directly to your door. What better way to get sailing at a fraction of the cost of factory-built boats.
