

**Manufacturer's comment:**

23 feet of mobile Grampian ingenuity, the G23 is a family sized boat that follows your car to those previously inaccessible cruising horizons, and lets you enjoy the best of many worlds. Space for comfort used to the ultimate. The same blend of speed and stability that makes this G23 a "must be seen" boat for those who want the enjoyment of cruising wed with the excitement of new waterways accessible only on wheels.

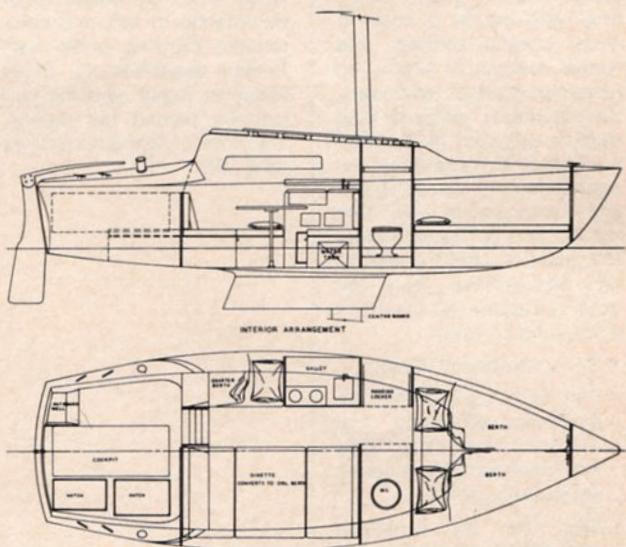

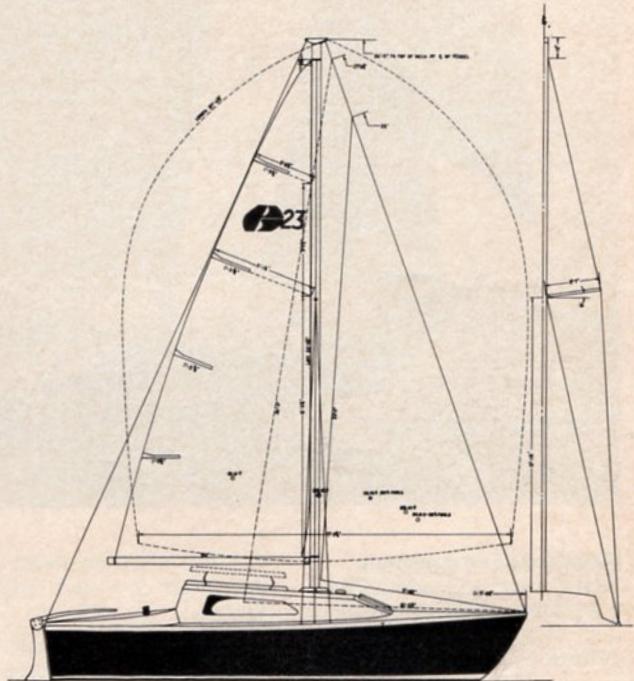

At the bow there are two roomy fore-cabin bunks with stretch out comfort; next the wide double bunk which converts easily into an ample table during the day. There's the cook's delight—an area that accommodates a two burner stove and sink and working space handily adjacent. The 7 ft. quarter berth completes the sleeping accommodation for 5 adults. The hanging locker and head complete the home-away from home. An added plus—you can "raise the roof" of this cleverly designed Pop Top to give ample 6 ft. headroom for those big people.

The sun-filled cockpit allows ample room for the helmsman, with space available for gas tank shelf, portable ice box and sail storage under the passenger seat. Access to the foredeck is via the hatch

forward of the main cabin. The G23 offers a surprising amount of leg stretching room for her crew of 5. Like all her sister Grampian designs, the G23 has a strong fiberglass hull that is designed for speed with comfort and sea-kindly tendency. No wave pounding—the Grampian 23 has been tested under severe weather conditions and was found to rise to every occasion.

Aluminum mast and boom, stainless steel standing rigging backed up by internationally manufactured sails and winches, combine to add the finishing touch. Your choice of sails makes the G23 either the high-spirited fast mover or the quiet cruising craft.
