

33
FT**Manufacturer's comment:**

The Grampian 34 is built in the Grampian tradition of fine craftsmanship, quality of material and built-in safety.

The 7 ft. headroom is really big and includes the following features: The dinette, with its unique elliptical table, is big—the berth is 7' long and 4'3" wide. A great big galley at 8' includes a stainless steel sink, stove/oven combination with three burners and an enormous 10 cu. ft. ice box—all standard (plus lots of storage). The stove is right beside the companionway to give cook lots of air and company. The galley is right opposite the dinette for easy serving.

For safety and movement, two grab rails are on either side of the companionway steps, one big teak pole at the bottom stretching to coach the roof and mast support to the cabin sole.

The quarter berth, 6'8" in length and almost 4' wide, is big and can be completely private with its own L-shaped curtain running between it and the dinette. There are shelves as well as a large storage area under the bunk.

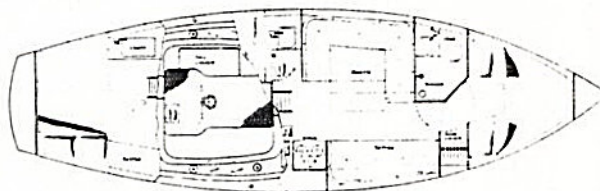

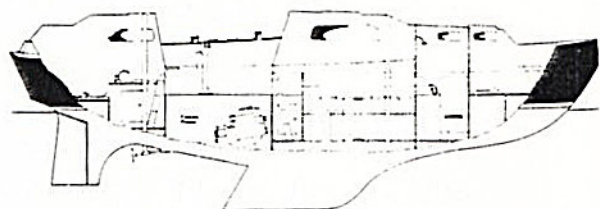

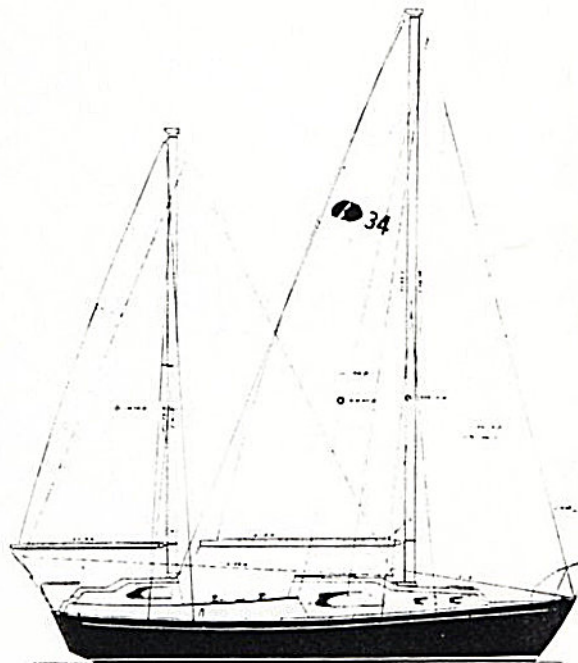

The forward head is light and airy with standing headroom and its own port light. The Pullman type molded wash-basin folds out over the toilet. A molded shower compart-

ment between the head and the hanging locker opposite gives room for shower facilities if requested.

The owner's cabin aft gives you privacy plus comfort with wash basin, vanity and small settee as standard, and a 6'6" double berth. An enclosed head is offered as extra. There is storage space under the bunk and vanity, plus a wet locker at the bottom of the companionway ladder. The leg stretching luxury of 7 ft. headroom with two heads, the privacy of the owner's cabin—all typify the luxury and appointments of this beautiful craft.
