

GULFSTAR 44 MOTORSAILER

44
FT

Manufacturer's comment:

The Gulfstar 44 is a cruising man's dream. First in importance, of course, is seaworthiness. Her 14 foot beam provides an inherently stable hull, and with internal cast lead ballast and all fuel and water tankage bonded in below the waterline, she is a stiff boat in heavy weather. Fiberglass hull and deck construction are rugged enough for offshore cruising, and a long keel provides shoal draft which allows access to many places conventional sailboats would not dare to go.

And to top it off, Gulfstar has built all of this into a planing hull! For those times when you want to get there quicker, just crank up her hefty diesel.

But the real beauty is inside. Room. Lots of it. The spaciousness of the main salon with dinette, settee, and galley must be seen to be believed. The forward cabin with vee berths has its own private head. Aft of the walk-in engine room, which is easily accessible from the passageway, is the magnificent owner's stateroom with lockers, bureau and private head with shower. Beautifully crafted teak trim is lavish throughout.

Safe, seaworthy, spacious, comfortable, functional and

dependable...the Gulfstar 44 has everything a cruising boat should have and then some.

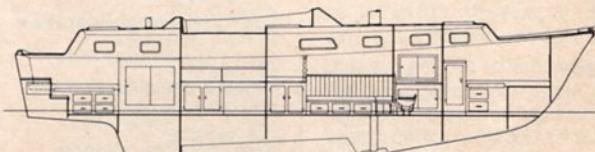

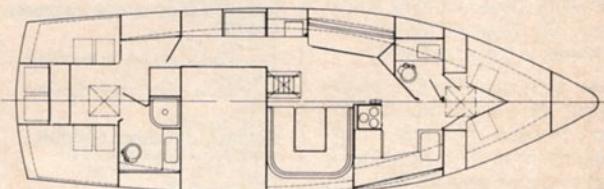

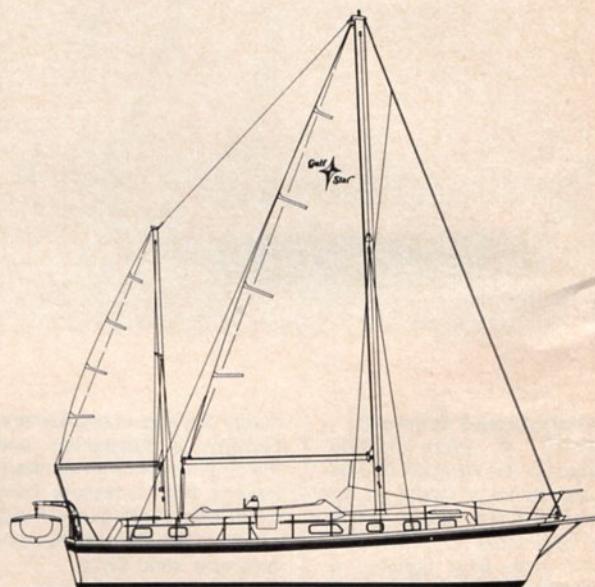

Standard equipment includes 130 HP diesel engine, carpeting throughout, two heads with sink, vanity and shower, refrigerator with freezer, three burner propane stove with oven, double stainless steel sink, pressure water system with 120 volt hot water heater, 12 volt electric bilge pump, two 12 volt heavy duty marine batteries, navigation lights, masthead and spreader lights, 120 volt shore power wiring, pedestal steering with destroyer-type wheel, genoa tracks, stainless steel bow and stern pulpits and lifeline stanchions, lifeline gates, and all necessary sheet and halyard winches and cleats.
