

A canvas or synthetic cockpit cover converts the large cockpit into living space while at anchor. These yachts can have an outboard for auxiliary power as shown in the photo, or an inboard.

## HARTLEY T.S. 21 KEEL YACHT

Hartley 21 Trailer Sailer plans are complete with drawings showing how these yachts can be built with a 26ft. mast and fixed fin which has the lead ballast on the bottom of it. This makes this boat self righting and non capsizable. Side decks down both sides of the cockpit are wide enough to float the hull in the event of her being laid on her side and if the cockpit floor is raised and made self draining no water can enter your hull at any time. A 24 ft. high mast is used for the centre board version shown on previous pages.

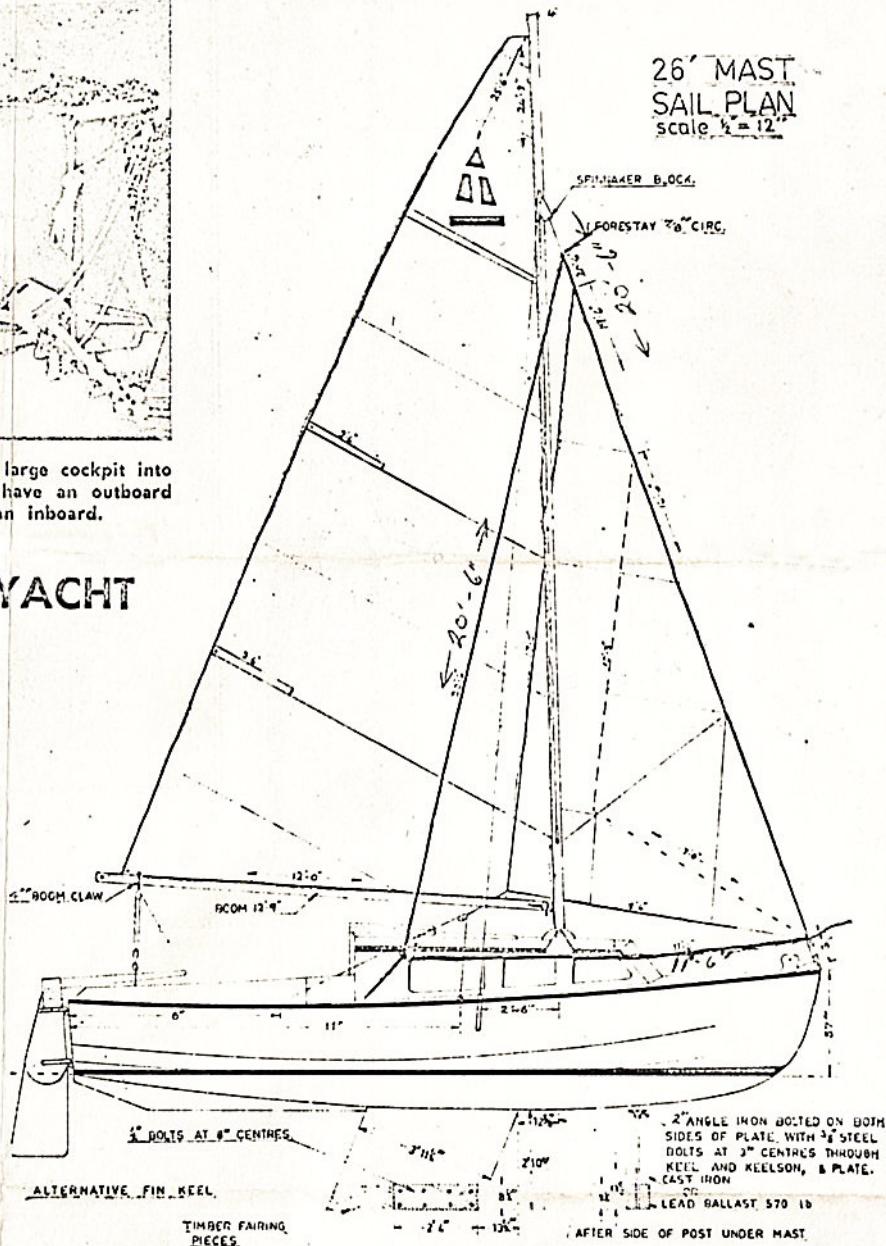

Price of complete plan:

S42 in N.Z. £24 Sterling.

\$48 in Aust.

S57 U.S.A.

Plans sent airmail post free to any part of world.
