Beam	9.84'	P	38.17'
Draft	7.0'/1.75'	E	14.43'
Ballast	1,750 lbs.	Designer	Glenn Henderson
Dspl.	3,850 lbs.	Price	\$54,750.00

**T**he Henderson 30 has been launched and sailed in the full range of conditions. We can report that it is extremely fast. Upwind, downwind, light and heavy air, this boat is quick. We can also report that the numerous innovations found on the Henderson 30 work to an astounding degree of effectiveness. One innovation that seems to attract the most praise is the CRO unit (Contained Retractable Outboard). The CRO Unit operates and functions just like an inboard except that it's lighter, cleaner and less expensive. The system pulls up easily, sealing off the opening in the underbody with a recessed, flush mounted plate. Included is an electric start, blower system and convenient shift/throttle controls. A common remark is, "Why hasn't someone done this before?" The VARA System (Variable Aspect Rudder Assembly) allows you infinite vertical adjustment in raising and lowering the Carbon Fiber blade. In fact, you and your crew will actually feel the boatspeed increase the moment you raise the rudder while sailing offwind! Additionally, the sweep angle can also be adjusted, making the helm lighter or heavier to suit your own personal preferences. The VARA System's rudder is easily removed at the end of the day so there will never be any salt or fresh water growth. The underdeck runners and backstay, curved traveller base, and raised mainsheet pedestal go almost unnoticed beside the unique and highly functional innovations. The Henderson 30 is unmatched in value. SOCA Sailboats in Port of Spain, W.I. has executed the construction of the HENDERSON 30 to a level of quality second to none. When you evaluate this boat, you will see that everyone involved put out a championship effort to produce a very special Sport Boat. The cost is lower as well. There are no dealers so their commissions are your savings. Come and join the group of new Henderson 30 owners and bring excitement back into your sailing.
