

The new generation...the sailing trainer for performance enthusiasts. After two years in development, the newest member of the Hobie family is in production and it's everything the designers had expected and more. For the first time, the small boat owner can have the speed and maneuverability without sacrificing stability. The Mono-Cat is built to establish a new tradition in small boating and to match the overwhelming success of her predecessors. Like the rest of the family, The Hobie Mono-Cat will create a class of her own.
