

HOBIE 12 MONO-CAT

HOBIE 12 MONO-CAT

The newest design in the famous Hobie sailing family.

Hobie Alter — the man behind the innovative design of the all new MONO-CAT is known for his uncompromising demand for quality and performance in the Hobie product line. When asked about the MONO-CAT, Hobie describes it as, "a neat little boat!" In Hobie's language (famous for understatement) that means the best, most functional and fun small sailboat available anywhere!

Until the MONO-CAT, the exhilarating speed and performance of a catamaran were unavailable in a small sailboat. Now, you can have both the excitement of speed and the assurance of stability and confidence with the newest Hobie Cat.

From the initial design which is fresh and original, to a revolutionary new manufacturing process, developed exclusively at Coast Catamaran to meet the Hobie emphasis on quality, the new MONO-CAT is built to establish a new tradition in small boating. Designed to match the overwhelming success and acceptance of its Hobie predecessors. In every Hobie Cat, that acceptance has been justified by outstanding performance and in all the initial testing of the MONO-CAT it has met every expectation of her designers, out-performing all other craft in her category.

Study any Hobie — you'll find marine hardware of the highest quality — if it's not available or if the high standards can't be met, we build it ourselves. No other boat, including off-shore power boats, can match Hobie's strength and durability.

☐ **CONTOURED COCKPIT** / A specially shaped area designed to comfortably accommodate two adults, affording support whether in a sitting position or both reclining for a leisurely down wind sail. Two large bailer tubes insure a dry cockpit under the hardest sailing conditions.

☐ **BUILT-IN SAFETY** / Built-in positive flotation. Can be righted by a 50 lb. child.

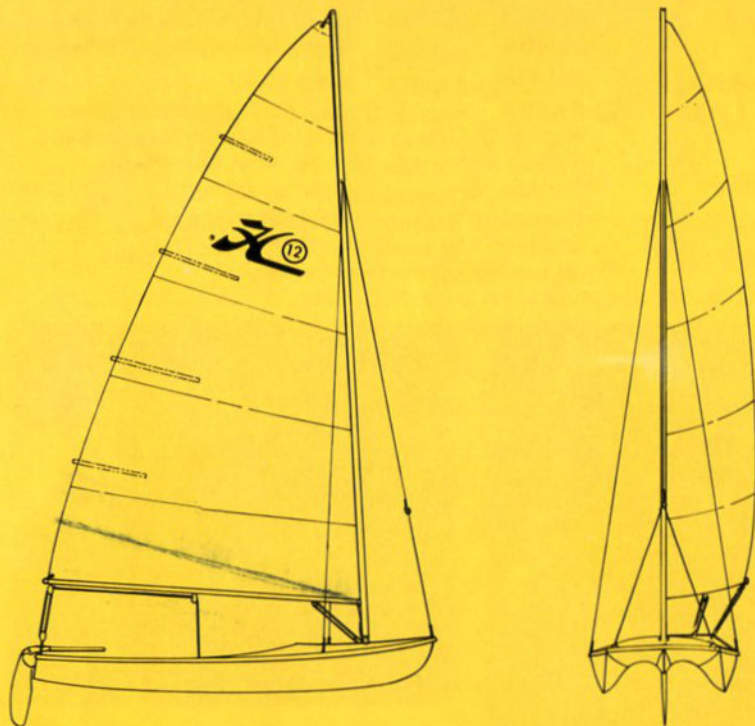

☐ **STORAGE COMPARTMENTS** / Two large separate water-tight compartments to store jackets, lunches or whatever.

- ❑ **ROUNDED ASYMMETRICAL HULLS** / Provide a high degree of stability by supplying buoyancy on the extreme outer perimeters, yet fine enough to knife through the water at racing speeds.
- ❑ **THE SEMI-TUNNEL HULL** / Incorporates a reverse "spine" to deflect and dampen chop pounding.
- ❑ **PERFORMANCE** / Truly exhilarating—even with 300 lbs. of adults aboard.
- ❑ **RACE READY** / Comes complete with downhaul, boom vang, and traveler control.

- ❑ **PORTABILITY** / Specially designed to fit in the back of a station wagon or on top of a car and of course it is trailerable.
- ❑ **RETRACTABLE CENTERBOARD** / Controlled from the cockpit allowing you to sail right up on the beach.
- ❑ **CONTROLLABLE KICK-UP RUDDER** / A new design resulting from the tried and proven Hobie Cat kick-up rudders—affords carefree sailing over unseen obstacles—the rudder will automatically kick-up upon contact.

- ❑ **TWO PIECE MAST** / Aerodynamic aircraft alloy extrusion with completely internal connections is easily transported when uncoupled. Lightweight yet exceptionally strong.
- ❑ **EASY RIGGING** / Unique ball-joint base allows mast to be easily raised and rotated for improved sailing efficiency. Integral mast luff groove permits raising and lowering sail without unrigging the mast. Foot of the sail is loose and is adjustable. Shrouds and forestay designed so that a child can easily rig the boat in minutes.

SPECIFICATIONS

LENGTH 11'9"

BEAM 4'

WEIGHT 150 pounds

SAIL AREA 90 square feet

DRAFT 4"

SAIL Tetron, 3½ oz. wt., Hobie design

SELF-BAILING

HULL MATERIAL: expandable polystyrene foam reinforced ABS

FLOTATION: foam
