

# The Hobie Cat 14

## Hobiethrill

Your first sail on a Hobie 14 will be a real stoker—whether you're ghosting along on a pleasant day sail or flying the hull hard and fast on a screaming reach. Officially clocked at an amazing 23.2 mph, the Hobie 14 gives you the best sea-level "high" around. Yet its simplicity of design lets you sail it off the beach and makes it easy to handle, easy to tame. That's the thrill—and the beauty—of this Cat.

## Hobiestoke

Join the Hobie Fleet! The Hobie Class Association offers the largest program of organized catamaran racing in the yachting world. Over 1,000 Hobie regattas are held every year, wherever there's wind and water. And since entrants race against others of similar skill and experience—from novice to pro—nobody's overmatched. But whether you race or not, you'll still receive the Hobie Hot Line, our own class magazine, to keep you in tune with the Hobie World.

## Hobielife

Hobie sailors have more fun! As one owner put it, "You don't just buy a sailboat, you buy a whole new way of life." Sailing is part of it, racing is part of it. You'll make new friends—active, successful people who enjoy life—and go to some of the biggest and greatest camp-outs and beach parties in the world. Hey, what are you waiting for? Have a Hobie Day!

## Hobietough

A Hobie can take it. We've designed and built them so they'll always look great even though they're strictly low maintenance. But when the wind is up and the going gets rough, you want to know you've got everything going for you. That's why Hobie Alter designed this Cat to withstand the most rugged sailing conditions you'll ever wish to challenge. Every so many units, a Hobie sailboat is taken from the production line and tested to destruction. Sliced into sections, it's checked for proper thickness, construction and structural integrity. Hobies have been subjected to tests and exposed to forces you're not likely to find unless you're trying to sail in a hurricane. And if you think we're being over-cautious—well, maybe you're right. But maybe—just maybe, that's what's made Hobie the world's most popular catamaran.

## Hobie Cat 14 Highlights

### • Design & Construction

**Speed**—Officially clocked at 23.2 miles per hour—can you beat it?

**Asymmetrical Hulls**—For sailing efficiency, simplicity and speed without leeway; eliminates the need for centerboards.

**Controllable Kick-up Rudders**—An exclusive Hobie design that allows positive raising and lowering of rudders by the tiller handle. No need to set rudders by hand. Rudders automatically kick up when beaching.

**Built-in Positive Flotation**—An important safety feature.

**Shallow Draft**—Sail and explore anywhere you find 8 or more inches of water.

**Light Weight**—Weighing in at around 240 pounds, the Hobie 14 is easily launched from beach or trailer.

**Fully Battened Main**—Provides optimum sail shape for maximum performance.

**Overbuilt**—Molded fiberglass hulls with vacuum high density foam sandwich construction provides incredible impact resistance.

**Less Drag**—Unique hull design without centerboards, and a raised trampoline, cut drag to a minimum.

**Sail in the Surf**—Asymmetrical hulls without centerboards to raise let you sail the surf right onto the beach.

**Easier to Trim**—The exclusive shape of the hull allows you to trim a Hobie more effectively than any other catamaran.

### • Comfort and Ease of Sailing

**A Joy to Sail**—In one afternoon, even a novice can make a Hobie perform and maneuver with unbelievable ease.

**Take a Friend**—Even though the Hobie 14 is designed for single-handing, you can easily take a friend or two along.

**Drier**—Raised trampoline wing keeps you drier, in a race or on a cruise, than any comparably-sized catamaran.

**Tiller**—The tiller extension swings aft rather than past or through the working area, and is easier to handle.

**Launch Anywhere**—Easily trailerable and beachable, lets you sail wherever you want.

**Fly a Hull**—Push a Hobie to the limit, its hydro-dynamic bow and raised wing let you fly a hull with greater ease and stability.

### • General Features

**Warranty Protection**—Hobie Cat stands behind every boat it makes, and we'll be there tomorrow if you need us.

**Maintenance Free**—Anodized aluminum spars, fiberglass hulls, stainless steel fittings and dacron sails make a Hobie virtually carefree.

**Easy Storing**—Remove just four bolts and store your Hobie away compactly in the off season.

**Worldwide Service**—Authorized Hobie Sales and Service Centers can be found just about anywhere in the world.

**Highest Resale Value**—Protects your investment when you buy your second Hobie Cat.

**New to sailing? It only takes a day to learn to sail a Hobie. Ask any Hobie dealer for a free demonstration ride, or enroll in one of our many Hobie Sailing Schools.**
