

Hobie TriFoiler

When was the last time you went 35 MPH in a sailboat? With the Hobie TriFoiler, your wildest dreams of speed will come true. The TriFoiler is quite simply, the most amazing sailing machine on the water today. Take the pilot's seat in the center cockpit with all the sail and foil adjustments on the control panel in front of you and you're off. All it takes is 12 knots of wind for the three self-adjusting hydrofoils to lift off and you're flying! Check your speed on the built-in speedometer as you streak past everything else on the water while controlling your course with the steering pedals. From speed runs, to the thrill of high G-force turns, the TriFoiler delivers excitement like nothing else can.
