unter isn't afraid to break a few eggs if it means building a better boat. Comfort, performance, livability, and durability are the goals, while engineering, design, materials and components are the tools.

Creative thinking and ocean experience combine to bring you the best in sailing.

With 10 different boats in the fleet, Hunter offers the individual sailor with a variety of choices and options, opening an entire world of possibilities on the open seas.

◆ **B & R rigs** are far more efficient, easier to sail, and notably faster than conventional masthead rigs. The need for a backstay is removed by the swept-back spreaders and the diagonals on the B & R rig. Hunter's Child proved this in the recent BOC.

◆ The absence of a backstay allows for a larger roach in the full-batten main. This means more power and more versatility in sail handling under reefing conditions.

◆ Cockpits are wide to the sheer allowing more room for the custom consoles and all the crew. Walk-through transoms provide great access and abundant storage.

◆ **Innovative Arches** – allow placement of the Harken® traveller, lights, speakers, and also as an attachment point for a bimini. This keeps the cockpit clear and unobstructed.

◆ **Taffrail Seats** – The best seat in the house; keeps you clear of the action, but in view of everything.

◆ **Composite Rudder Shafts** are larger, stronger, weigh less than stainless, and are corrosion free. Sturdy Rack and Pinion steering provides great sensitivity and feedback.

THE LEGEND CONTINUES

Hunter Marine has established a global presence, with current distribution in over 40 countries around the world. A universal standard, Hunter sailboats are designed to meet the strenuous requirements of the Atlantic and Pacific Oceans, the Sea of Japan, the Great Lakes, the Baltic Sea, or wherever you choose to sail.

With Hunter, you're always guaranteed to *Go The Distance*.

When the sun and the sails go down, it's time for Yanmar.

The engine of choice at Hunter Marine for over 20 years. Smooth, quiet, reliable Yanmar engines are the strength of experience that you can depend on when you select quality Hunter boats.

From the first throttle up in the morning to that final purr to your evening mooring, you'll appreciate the reliability built into every Yanmar marine diesel. Pure marine power when you need it most. It's what makes Hunter Marine and Yanmar your sailing partners at sea.

◆ Galleys are spacious with extra storage. Corian® is both durable and beautiful. Appliances are first rate and it's all standard.

◆ The fractional rig with a small jib makes tacking and sail handling easy for even the short handed sailor. It also allows for closer sheeting angles for better performance.

◆ Smaller headsails allow for a wider chain-plate base. By anchoring the shrouds directly to the hull via composite attachment, loads are distributed to a wider base which reduces tension and compression on the structures.

◆ 5 Year Limited Hull and Blister Warranty - One of the "Best in the Business" factory backed by one of the largest independent family of boat builders in the U.S.*

INNOVATION

◆ Hunter's new mast struts allow for smaller sections of the mast which reduces weight and windage aloft while increasing stability and performance below.

◆ Salons are wide open. Windshields and ports allow plenty of natural light and ventilation. Perfect for dining, entertaining, or just relaxing.

◆ Hunter was one of the first to standardize bulb-wing keels. Deep draft keels are also available on many models.

specifications, equipment and / or accessories. Standard equipment may vary for products sold outside the United States. * See your local dealer for full details. All measurements throughout this brochure are approximate.

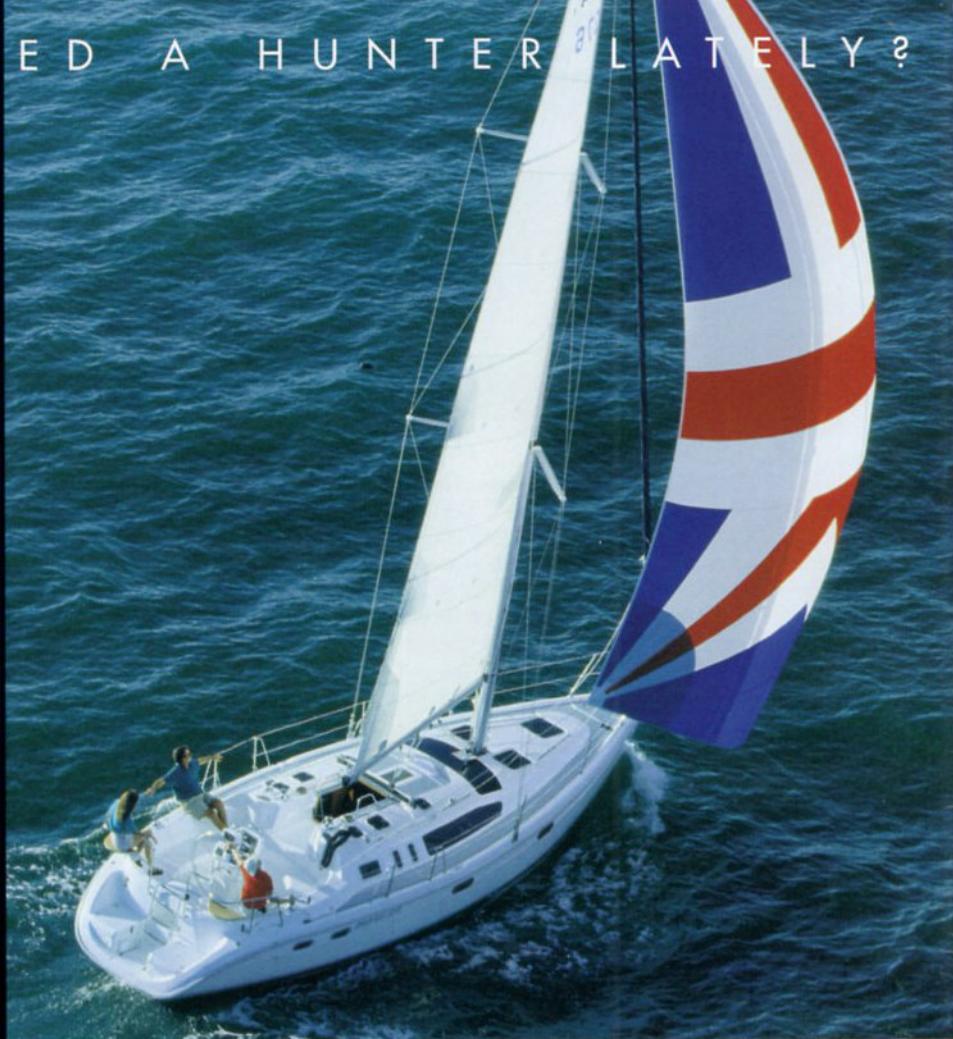

HAVE YOU SAILED A HUNTER LATELY?

Innovation is what has driven Hunter to the forefront of the production sailboat business. Never content to just sit back, Warren Luhrs, Hunter's chairman and founder, is always searching for better ways to build boats. Warren and the entire Hunter Design Team consider thousands of new ideas every year. If these new ideas can make a Hunter perform better, be more comfortable, or be easier to sail, Hunter will incorporate it. This is just one of the ways Hunter adds value. This innovation, combined with the latest technology and efficient production methods assures you of a quality sailboat at an affordable price.

Today's Hunters are being sailed in 10 different sizes from 23.5 to 45 feet and being sold in more than 40 countries around the world.

Come sail a Hunter today - You'll know how we "Go The Distance" for you.
