

# Hylas 51

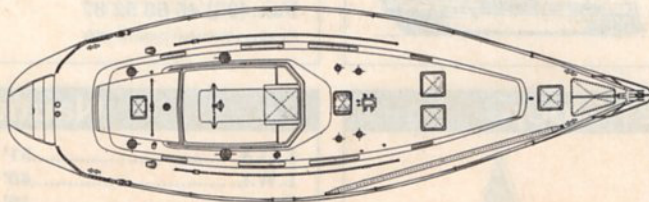

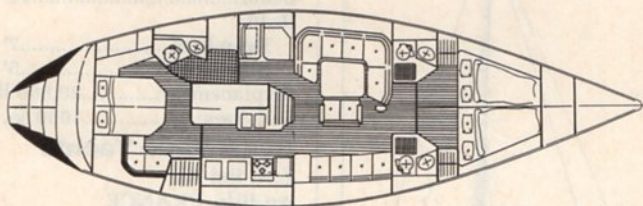

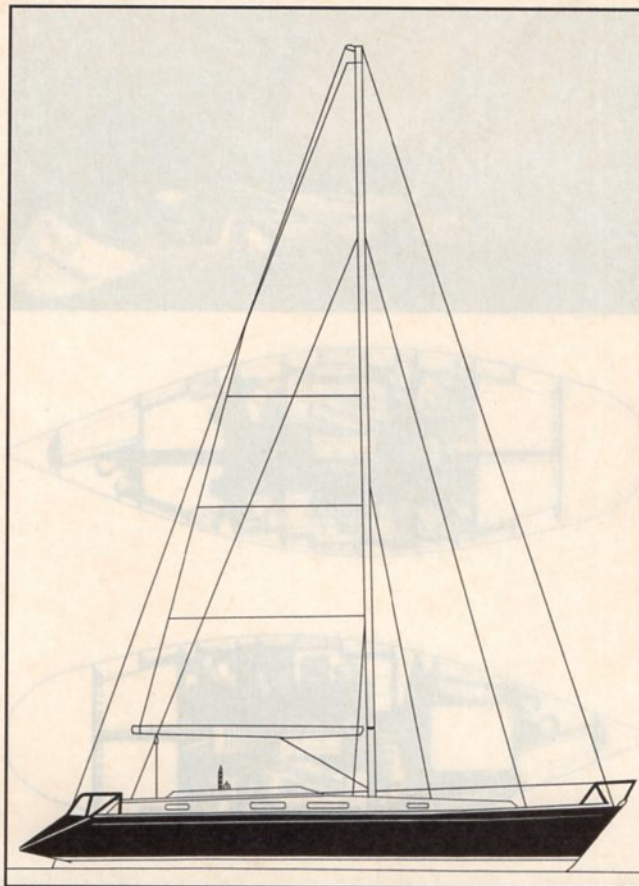

50'

One of the very few center cockpit, high performance sailing yachts designed by world famous German Frers, Queen Long's new Hylas 51 proven design concept is based on years of bluewater cruising and charter experience, calling for ease of maintenance and convenience of user in the best of ocean-going tradition.

Her solid hand-laid fiberglass bottom and Divinycell cored topsides and deck attest to her lightness and superior strength, while the finest names in marine hardware and equipment ensure a trouble and maintenance free cruise, as is usual to expect from the best. The decks are wide and uncluttered, with all the sheets laid to the cockpit. The integral bathing platform has molded-in boarding steps.

The spacious interior is well-ventilated and built in genuine light teak. The owners' master stateroom aft has an island queen-sized bed, ensuite heads, and a shower stall. The interior also includes self-contained twin guest cabins forward, fully fitted galley with acres of work-tops, and a circular salon/dinette arrangement nav station with centralized ships control systems. The fully insulated engine room provides easy access to engine and auxiliaries.

The Hylas 51 is built to order to customers' specifications and fully equipped to go to sea with a shallow draft keel as standard.
