

INTERNATIONAL 420

The Vanguard International 420

The 420 is one of the most popular international, one-design racing and training boats in the world. There are more than 45,000 420s sailed in over thirty countries. Vanguard has been building 420s since 1975 and we believe our current boats are the best yet.

The best fiberglass technology has been used to build the 420. High quality materials, selected for the most most appropriate application, are hand laminated using Vanguard's exclusive pre-wetting techniques and vacuum-bagged into the hull mold to produce a 420 hull that is stiff, light, and durable. The Vanguard molds are widely held to be the finest in the industry and produce a smooth, fair boat with an optimized hull shape that even looks fast in the parking lot.

The equipment on Vanguard

420s is complete and well thought out. Harken blocks and cleats are standard and provide excellent sail control. Proctor spars are standard with either the Kappa or the C section available. Dual spinnaker bags matched to your deck color are mounted

on either side of the mast partners. The Vanguard 420 is race ready when it leaves the factory.

We build every 420 as if it were a world champion, because it just might be! Vanguard's record proves that if you want to win you should be sailing a 420.
