

If PHRF is a measure of both performance and popularity of a design, J/29 is the most successful sailboat introduced since 1982. It already ranks eighth among all sailboat designs ever built!

Owner enthusiasm for J/29's sailing characteristics have evolved into the J/29 Class Association with one-design fleet activity on the Chesapeake, San Francisco Bay, the Jersey shore, and the Texas Gulf. A North American Championship is held annually.

For its price and speed, J/29 is the most seaworthy offshore sailboat available. She comfortably holds a crew of 10 daysailing on spacious side decks, yet there's comfort below in a variety of optional arrangements for coastal cruising.

J/29 is built to take a pounding. Just compare the laminated structural bulkhead, keel-support beams, hull/deck joint, rig hardware, and a new 10-year warranty

against blisters with any other boat its speed!

J/29 has a balanced water plane with enough freeboard and reserve buoyancy forward to keep from submerging when surfing under spinnaker in steep seas. And there are few boats that will plane downwind in heavy air with better control. The faster J/29 goes, the more stable she becomes.

L.O.A.....	29' 6"
L.W.L.....	25' 0"
Beam.....	11' 1"
Draft.....	5' 8"
Ballast.....	2,100 lbs.
