

# ***Johnson MC Scow***

## High performance racing thrills

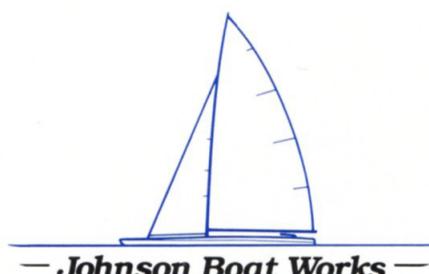

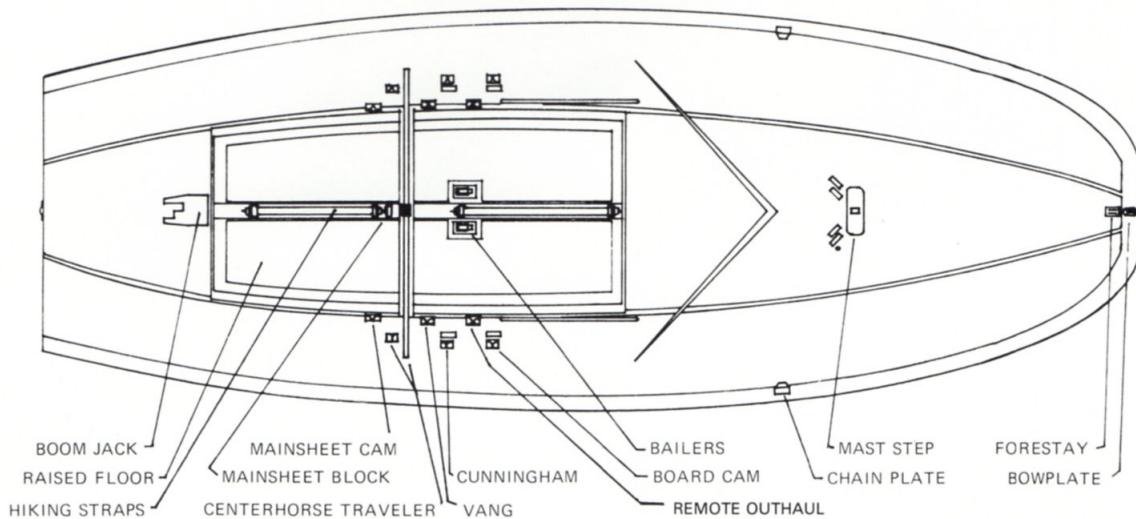

The sixteen foot Johnson MC is the ideal single-handed racing Scow. All of the control lines are easily accessible to the skipper and provide enough sophistication for the most experienced sailor. Hardware placement leaves lots of room for crew or friends looking for a thrilling ride. A midship traveler and high aspect rig allows for maximum control in heavy air. The Johnson MC is built with the racing sailor in mind. The attention to detail never quits, with standard features, such as Harken cams and blocks standard on all control lines.

## National one-design class

The MC has a large, National, one-design racing class, with regattas held across the country. It is a sanctioned ILYA racing class with strong fleets throughout the midwest. The Johnson MC has won many National Championships, and has performed equally well at local and regional regattas. It is the best sailing investment you will ever make!
