

KORALLE III

BY SUNSAIL

Koralle II is the fastest selling family daysailer on the market today. It is built of all hand laid fiber glass to insure strength and low maintenance while at the same time keeping the hull weight to a uniform 140 pounds. Koralle is designed so that it can be rowed or even take a small outboard. Easily car topped and rigged, it makes the perfect small family sloop or junior sailing trainer.

Standard equipment on the Koralle II includes: mahogany rudder and a centerboard, color coded sail panel, anodized aluminum spars, full positive floatation and a storage compartment large enough for a small outboard and cooler.

The Koralle II is available in your choice of colors (tangerine, blue, lime green, yellow).
