

SUNSAIL

KORALLE II

KORALLE

KORALLE

Koralle II is the fastest selling family daysailer on the market today. Koralle II is safe, stable, and exciting to sail. The Koralle II is built of all hand laid fiber glass to insure strength and low maintenance while at the same time keeping the hull weight to a uniform 135 pounds. The Koralle II is designed so that it can be rowed or even take a small outboard. The hardware, rigging, and sails on the Koralle II are all of the highest quality. The Koralle II is easily car topped and easily rigged, making it the perfect small family sloop or junior sailing trainer.

Standard equipment on the Koralle II includes items not found on any other small daysailer, such as its hand shaped mahogany rudder and a centerboard instead of the normal daggerboard arrangement. Also included are color coded sail panel, anodized aluminum spars, full positive floatation and a storage compartment large enough for a small outboard and cooler.

The Koralle II is available in your choice of colors (tangerine, blue, lime green, yellow, maroon) at the incredibly low price of **\$995.00**.
