

Laser  **2**®

Laser 2 gets you where you're going with greater speed, ease and fun than any of its cumbersome competitors. The Laser 2 is the two person boat embodying the Laser philosophy that sailing pleasure is derived from great performance and responsive handling.

Smart sailors understand the importance of a boat's weight. The Laser 2 weighs only 170 lbs., allowing it to be easily cartopped and launched. Lighter also means faster and easier to handle. Heavier boats of similar size are difficult to transport and launch. Performance can be sluggish and the motion of the boat awkward. Compare boat weights when looking at two man dinghies. Why bob like a cork when you can glide over the water on a Laser 2?

If you are searching for a responsive two person boat with sparkling performance, there is only one choice. The Laser 2 is the daysailer that's invigorating to sail. The cockpit has plenty of room and is designed for comfort regardless of sitting position. Sprawl out in the middle of the cockpit, or sit comfortably on the side decks. If you really want to go for it, there's always the trapeze to hang over the water for some real excitement!

The Laser 2 is the most popular doublehanded racing class in the United States and Canada. Unlike other doublehanded boats, the Laser 2 has active fleets in every region of North America. Up to 100 teams typically participate in the major North American events.

The International Yacht Racing Union has selected the Laser 2 as the doublehanded boat for the IYRU/Nautica World Youth Championships through 1997! Canada has sanctioned the Laser 2 as it's national youth trainer. The Laser 2, widely used all over the U.S., is considered the foundation of success in U.S. youth sailing. The Laser 2 World Championship, held biannually, attracts over 200 teams from around the world. Laser 2 is truly the established modern doublehanded standard.

Great looks, simple rig, low cost, enormous events, popular class and lightweight, performance hull make the Laser 2 an unbeatable package.

Laser 2 Features

IYRU Approved International Class

- The original doublehanded strict one design (including sails)
- Competition is a true test of skill
- Largest doublehanded regattas anywhere

Easily Transported

- Cartoppable
- Two piece mast
- Lightweight 170 lb. hull

Widely Used by Sailing Programs

- Easier to teach sailing with responsive boat
- Durable construction
- Expert Laser factory authorized service available throughout North America

Durable Construction Proven Over 10 Years

- Modern engineering using proven cored fiberglass technology
- Durability, without cumbersome weight, achieved through selective reinforcing
- High resale value
