

Little Harbor 42

43'

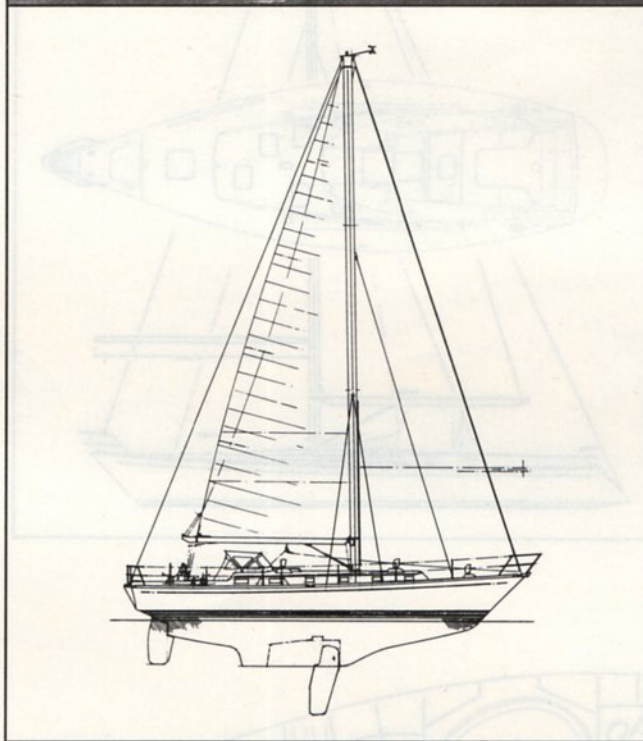

The Little Harbor 42 was designed by Ted Hood as a continuing evolution of his more than 57 designs built since 1959. His concept of a moderate to heavy displacement, keel/centerboard hull driven by a powerful rig has been refined on this boat with a strong emphasis on cockpit layout and ease of handling.

This design philosophy provides for many desirable features. Most importantly, performance is exceptional in all conditions because of a high sail-area-to-wetted-surface ratio and high ballast-to-displacement ratio. The beam and displacement of this boat also provide more interior volume for living space, and the tankage and shoal draft/centerboard configuration allows access to shallow cruising grounds and, when down, improves windward performance.

The large cockpit includes a built-in teak table and custom steering pedestal. In addition, all sail control lines are led aft so that the helmsman can sail the boat virtually single-handed.

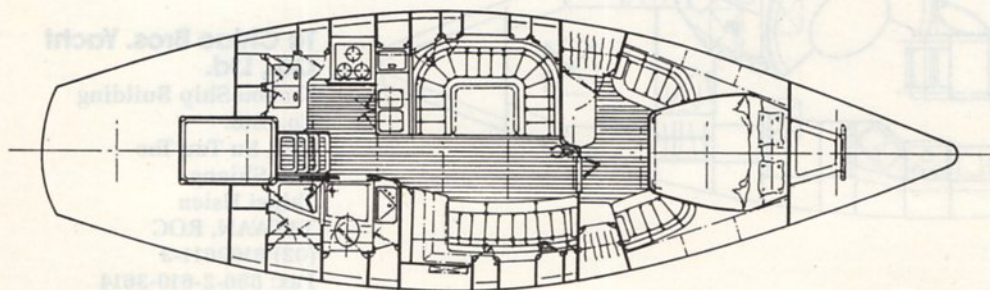

Each boat is custom built inside and out. Our design team works closely with the owner to design an interior layout and to specify proven equipment that meets a particular owner's individual requirements.

Hull construction is hand-laid fiberglass with Airex foamcore. Decks are built with Divinycell foamcore. Standard features include teak decks, teak toerail, Barient self-tailing winches, Westerbeke engines, Bass electrical panels and

bronze folding propellers. All deck hardware is custom-made stainless steel, including hatches, portholes, chain-plates, blocks and stemhead fitting.
