IT'S THE FASTEST SIND

## THE DESIGN

Two years of design and prototyping have created the MX-Ray: a product with an integrated hull and rig that is capable of planing in minimal wind, reaching explosive top end speeds and balancing on all points of sail with or without the spinnaker deployed. Most importantly, the MX-Ray delivers this kind of performance and is still approachable by all levels of sailing ability.

World renown designer Vlad Murnikov incorporated revolutionary design ideas to create this new type of hull shape which features a fine bow with contrasting wide points placed well aft and integrated, ergonomic wings. The wings provide excellent hiking leverage and stability while minimizing capsizing. The integrated rig and futuristic blades round out the design that generates the enormous performance of the MX-Ray.

## FREERIDE PERFORMANCE— THE 6/20 MAXIM

MX-Ray sets a new standard in single-handed sailing — a freeride sailcraft that combines the speed and wet excitement of windsurfing with the ease of sailing sitting down. No other single-handed design offers this kind of exhilaration and ease of use. In fact, we have created a whole new performance maxim: **Planes in just six knots of wind and reaches speeds of over twenty knots.** Even upwind sailing without the spinnaker is exciting since you have the ability to plane in moderate wind. Why be sub-planing in a thirty year old design?

## SIMPLICITY WHILE:

### SAILING

- *Effortless to handle while planing; in a gust, the MX-Ray accelerates rather than heeling excessively like older designs.*
- *Spinnaker halyard system offers previously unheard of convenience with deployment and retrieval taking less than three seconds.*
- *Deck layout allows for easy adjustment in any conditions.*
- *Capsizing is never a calamity as the MX-Ray is easily righted and can never swamp.*

### LAUNCHING/TRANSPORTING

- *Rigging takes only a matter of minutes. Step the mast, connect three lines and the MX-Ray is ready for the water.*
- *115 lb. hull weight means effortless launching from the yacht club dock or any beach.*
- *Simple to car top and easily handled with a beach dolly.*

## WANT TO RACE?

Check out the expanding race schedule on our web site — [www.m-yachts.com](http://www.m-yachts.com). Racing the MX-Ray is fun and exciting with speed trials, slalom and traditional courses. We look forward to seeing you at one of our events!

## NOT INTERESTED IN ORGANIZED RACING?

Spend the afternoon ripping around at high speeds, passing most other sailing craft as if they were standing still! Lose track of time as the MX-Ray provides you with limitless planing fun unlike any other single-handed boat.

GLE-HANDED MONOHULL IN THE WORLD.
