 LWL.....22'6"
 Beam.....9'0"
 Draft.....5'3"

Ballast.....1,930 lbs.
 Dspl.....5,200 lbs.
 SA.....383 sq.ft.

The Mariah 27, drawn by Graham & Schlageter, has compiled the most consistent winning record of any design in the history of MORC racing. The Mariah 27's *Thunderbolt*, *Bold Forbes*, *Pigs At Sea* and *Insatiable* have consistently crossed the finish line first over the last six years. The Mariah 27 is the first boat inspired by the Mariah Yachts philosophy of building the fastest custom designs on an affordable semi-custom basis. Mariah Yachts resolve is to provide a no-excuses boat in terms of racing performance and concourse quality, attributes normally obtained only with a custom program. Mariah's semi-custom production yields the finest in custom performance and custom quality, and allows for continued refinements like the new laminar flow keel developed last year. The Mariah 27's construction, by North Castle Marine, Ltd., is state-of-the-art utilizing biaxial E and S-glass fibers hand-laid at optimum load-bearing orientations with each hull and deck vacuum bagged to produce the lightest and strongest structure possible. The hull lines of the Mariah 27 provide a successful blend of generous interior space with race-winning performance, a combination that results in compromise in any other 27-footer on the market. Awesome, consistent boat speed and flawless quality distinguish the Mariah 27, both with the value obtained by semi-custom production. Call or write Mariah Yachts for more information. Build smart, sail smart and win.
