 I.....41'5"

J.....12'0"  
 P.....36'1"  
 E.....12'11"  
 Designer.....Alan V.  
 Andrews

Earlier this year the Mariah 30 FLAK won first in class and second overall at the SORC, and also won the U.S. Level 30 Championships while in Florida. The Mariah 30 is the latest addition to the Mariah Yachts line and it is further proving the Mariah philosophy of building the fastest custom designs on an affordable semi-custom basis. The Mariah 30 is based upon the race-winning Andrews 30 that has been so highly successful over the last four years. In the 1991 MORC Internationals, Mariah 30s were first and second in Gran Prix 'A', and first and third overall. But when you read about the PHRF and IMS performance of the Mariah 30 you'll know that this is a crossover boat with serious race potential in any competition. The Mariah 30's construction by Wiggers Custom Yachts, Ltd., is state-of-the-art utilizing unidirectional S-glass fibers hand-laid at optimum load-bearing orientations with each hull and deck vacuum bagged to produce the lightest and strongest structure possible. Dominating boat speed and flawless quality distinguish the Mariah 30, both with the value obtained by semi-custom production. Call or write Mariah Yachts for more information. Build smart, sail smart and win.
