## MEADOW BIRD 16

**MEADOW BIRD 16** is an evolution of a classic Titmouse design by Sam Rabel. She is an updated version with modern materials, more cruising room and better balanced sail plan. With these improvements she becomes one of the finest trailerable pocket cruisers available today. Trailer her behind any car for a daysail or extended cruise. She will delight you with her capabilities. She has an able hull with a selfbailing cockpit that should keep her out of trouble when conditions get exciting. Above all, she is a pretty design you will enjoy building and sailing. She will turn heads in any harbor or anchorage adding to the rewards of fun on the water. The **MEADOW BIRD 16** particulars are:

Length	16'-0"
Beam	6'-0"
Draft bdup	1'-0"
bddn	2'-6"
Weight	650 lbs
Sail Area	140sqft

**MEADOW BIRD 16** is an attractive traditional design using proven materials. Build her and you will enjoy many hours of on the water.

Don't wait to get underway!
