

## THE NEW LONG-WATERLINE MORGAN-28

DELIVERIES OF THE CENTERBOARD, spade rudder Morgan-28, designed to be a big boat for her size, began last June. The fiberglass hull has a long 23'9" waterline, ample beam and 6' headroom below where there is an enclosed head and berths for five persons. The cockpit is quite roomy for a boat of this size with so much interior accommodation. Inboard auxiliary power is supplied by a Palmer M-60 gasoline engine or an optional Universal Atomic 4.

The galley is conveniently located directly opposite the dinette (which converts to a 6'3" double berth). The top-loading ice chest has a maple cutting board lid. Note the large hanging locker located opposite the head. Some of the extra room below can be attributed to the wide trunk cabin which extends in a gradual slope nearly to the bow. This feature allowed designer Charley Morgan to retain a pleasing deck line.

A long list of factory-installed optional equipment and accessories allows owners to suit their individual requirements as to performance and livability.

Contact Morgan Yacht Corp., Box 13247, St. Petersburg, Fla. 33733 for further information.
