

NEW MORGAN 33T (¾-Ton).

This boat will be a winner. Essentially a refinement of the 36T, she also incorporates a wealth of the latest and soundest thinking in IOR design. She's 32'9" overall with a designed waterline of 25'1½" and a beam of 10'6½". Her price of \$23,995 includes freight, diesel power and complete racing gear, except sails, winches and instruments. If you want to go ¾-Ton, this is the *only* way to go.
