## Newport 28 Explorer

Capital Yachts, Inc. introduces the Newport 28 Explorer as the latest addition to their line of boats built in their Southern California plant. Designed by Cuthbertson and Cassian, the Newport 28 has a modern low-profile trunk cabin and full underbody with a cantilevered spade rudder.

A heavy-duty mainsheet traveler is located at mid-boom and the Newport 28 has a hard anodized toerail. The hull is hand-laid fiberglass with the boot top and cove stripe molded in. The deck is of laminated core construction.

The cockpit is designed to provide room for daysailing, cruising or racing. Two hatches are incorporated in the

cockpit seats. One locker may be used as an ice chest for cold drinks. The port locker also has an access door to the galley icebox so that a block of ice can be lowered directly into the icebox from the cockpit without having to carry it below.

Below decks the chart table opposite the galley converts to an extra cabin seat. A front opening to the icebox in the standard galley position makes items at the bottom accessible.

The table between the settee berths in the main cabin folds against the main bulkhead when the table is not needed.

An optional alternative interior arrangement has the galley located amidships to starboard.
