SPARS : Anodized aluminium alloy. Telescopic mast. Floating upper section.

SAIL MATERIAL : Dacron.

RUDDER AND DAGGERBOARD : Polyurethane coated marine plywood. Special hydrodynamic profiles.

SELF BAILER : Holt Allen.

Snapir's OD II the mini boat for maxi fun

DESIGNER: Ian Proctor of England is one of the best known yacht designers in the world. His designs include many one-design sailboats popular in Europe, several models of the International 14, and the International Tempest selected as a new Olympic class for '72. Following his previous MiniSail sailboard, Proctor designed, in collaboration with the famous American sailor George O'Day, the new and exciting one-design sailboat — the OD — 11.

BUILDER: SNAPIR SAILING CRAFT LTD., whose mainstays are top engineering and uncompromised quality, started production in '69. Snapir's scientific approach and remarkable craftsmanship earned world recognition when its first product — the International 420 — won the Israel, USA and World Championships in '69 and '70. Licenced by Ian Proctor, Snapir is proud to present its second hit: the OD — 11.

ADVANCED DESIGN: Scientifically arrives at best determined specifications for highest fun value per dollar. The design combines hydrodynamic perfection with attractive appearance and comfort. Full size cockpit provides ample space for the crew, and the high freeboard allows more knee-room.

SUPERIOR CONSTRUCTION: Snapir's exclusive feature — one-piece molded centerboard case laminated integrally with the hull — is applied to the OD — 11, too. Greater strength, absolute watertightness and a perfect fit for the centerboard are assured.

HIGH PERFORMANCE: Planes easily both in calm water or choppy sea. Challenges bigger dinghies. Thrills novice and experienced alike.

OUTSTANDING MANOEUVRABILITY: Excellent steering, lively response to rudder and sail.

SUPERB FINISH: Top quality gel-coat in a wide selection of glossy lasting colors.

EASY HANDLING: Vertically stored, car-topped by kids, rigged in seconds, easy to learn, instant fun.

PERFECTLY SAFE: Extreme stability. Built-in buoyancy. Floating mast upper section prevents turtling. Righting is amazingly easy.

CLASS ORGANIZATION: National and International Class Organizations are being formed to organize competitions and high performance racing fun.

Prices and specifications subject to change without notice.
