

## Manufacturer's comment:

The perfect family cruising sailboat for overnights or weekend vacations. The O'Day 22 is easily trailered and launched from most any ramp. She draws only 1'11" and is styled with a reverse transom. She's stable and strong, one piece hull with 100 lbs. of lead ballast, glued to the inside of the hull. Standard safety features include self bailing cockpit, foam flotation and self righting. A rugged, structural fiberglass interior reinforces the hull. A new sheet system for '75 gives more responsive sail handling. The tabernacle allows single-handed rigging.

For comfort and family safety, there's a deep, roomy cockpit with smooth action sliding covers gives easy access to the cabin. A bulkhead with sliding door separates fore cabin giving privacy to the aft compartment. The fore cabin is lined with a textured fiberglass finish. Galley table can be raised or removed for convenience. The O'Day 22 is manufactured at all O'Day plants in California, Indiana, and Massachusetts. Over 1,000 22's sold. Backed by O'Day's 2 Year and Medal Warranty.
