Low Wetted Surface · High Lift with Centerboard.

Dolphin comes within the basic legal width and weight limits for trailering.

**Design  
is the  
key to her  
sparkling  
performance  
and  
seaworthy  
cruising  
comfort**

**SPARKMAN & STEPHENS** has designed many of the world's most luxurious large cruising sailboats. And here—the S & S designed Pacific Dolphin 24—combining seaworthiness and cruising comfort with economical trailerability in keeping with the trend toward family participation... a rare combination for today's sailors.

**THE PACIFIC DOLPHIN 24** is a keel/centerboard masthead sloop of moderate light displacement and long waterline. Centerboard hoist and rudder profile assure performance downwind without impairing her windward capabilities.

**THE PACIFIC DOLPHIN 24's** hand laid-up fiberglass hull, careful construction, and structural integrity assure safe sailing. The teak interior gives her elegance and warmth in the tradition of fine yachts twice her size, and is built with craftsmanship you'll be proud of for years to come.
